

Silicon Valley Sky Park

Project Summary

We drew inspiration from cutting-edge technology conceived and produced by the great minds of Silicon Valley. We will provide the area with a unique identity, rooted in the local heritage of the past and present with a unique and inspiring monument.

Our vision is a design involving and integrating interdisciplinary collaboration. It seeks to nurture innovation by providing a park experience that rises into the sky offering unobstructed panoramic views.

We looked to Nature to find functional design principles and create solutions for net-zero capacity that kinetically responds to the environment. An Icon Awaits.
