

VALLEY SKYWAY

A grand footbridge embodying
the unifying spirit of Silicon Valley

WHY: By uniting Arena Green with a grand yet simple footbridge and inviting visitors to ascent the stairs and meet in the middle, the world's most important space will call for unity in a fresh, beautiful and awe-inspiring way.

WHAT: Valley Skyway will be transparent and organic in spirit, soaring upward and culminating at an otherwise unadorned vertex. Following the trend of NYC's Vessel by serving as both sculpture and staircase, it will invite visitors to literally ascend, and to discover more and more about their city and themselves as they climb ever higher.

INSPIRATION

NYC Vessel - Staircases as effective activation of public space

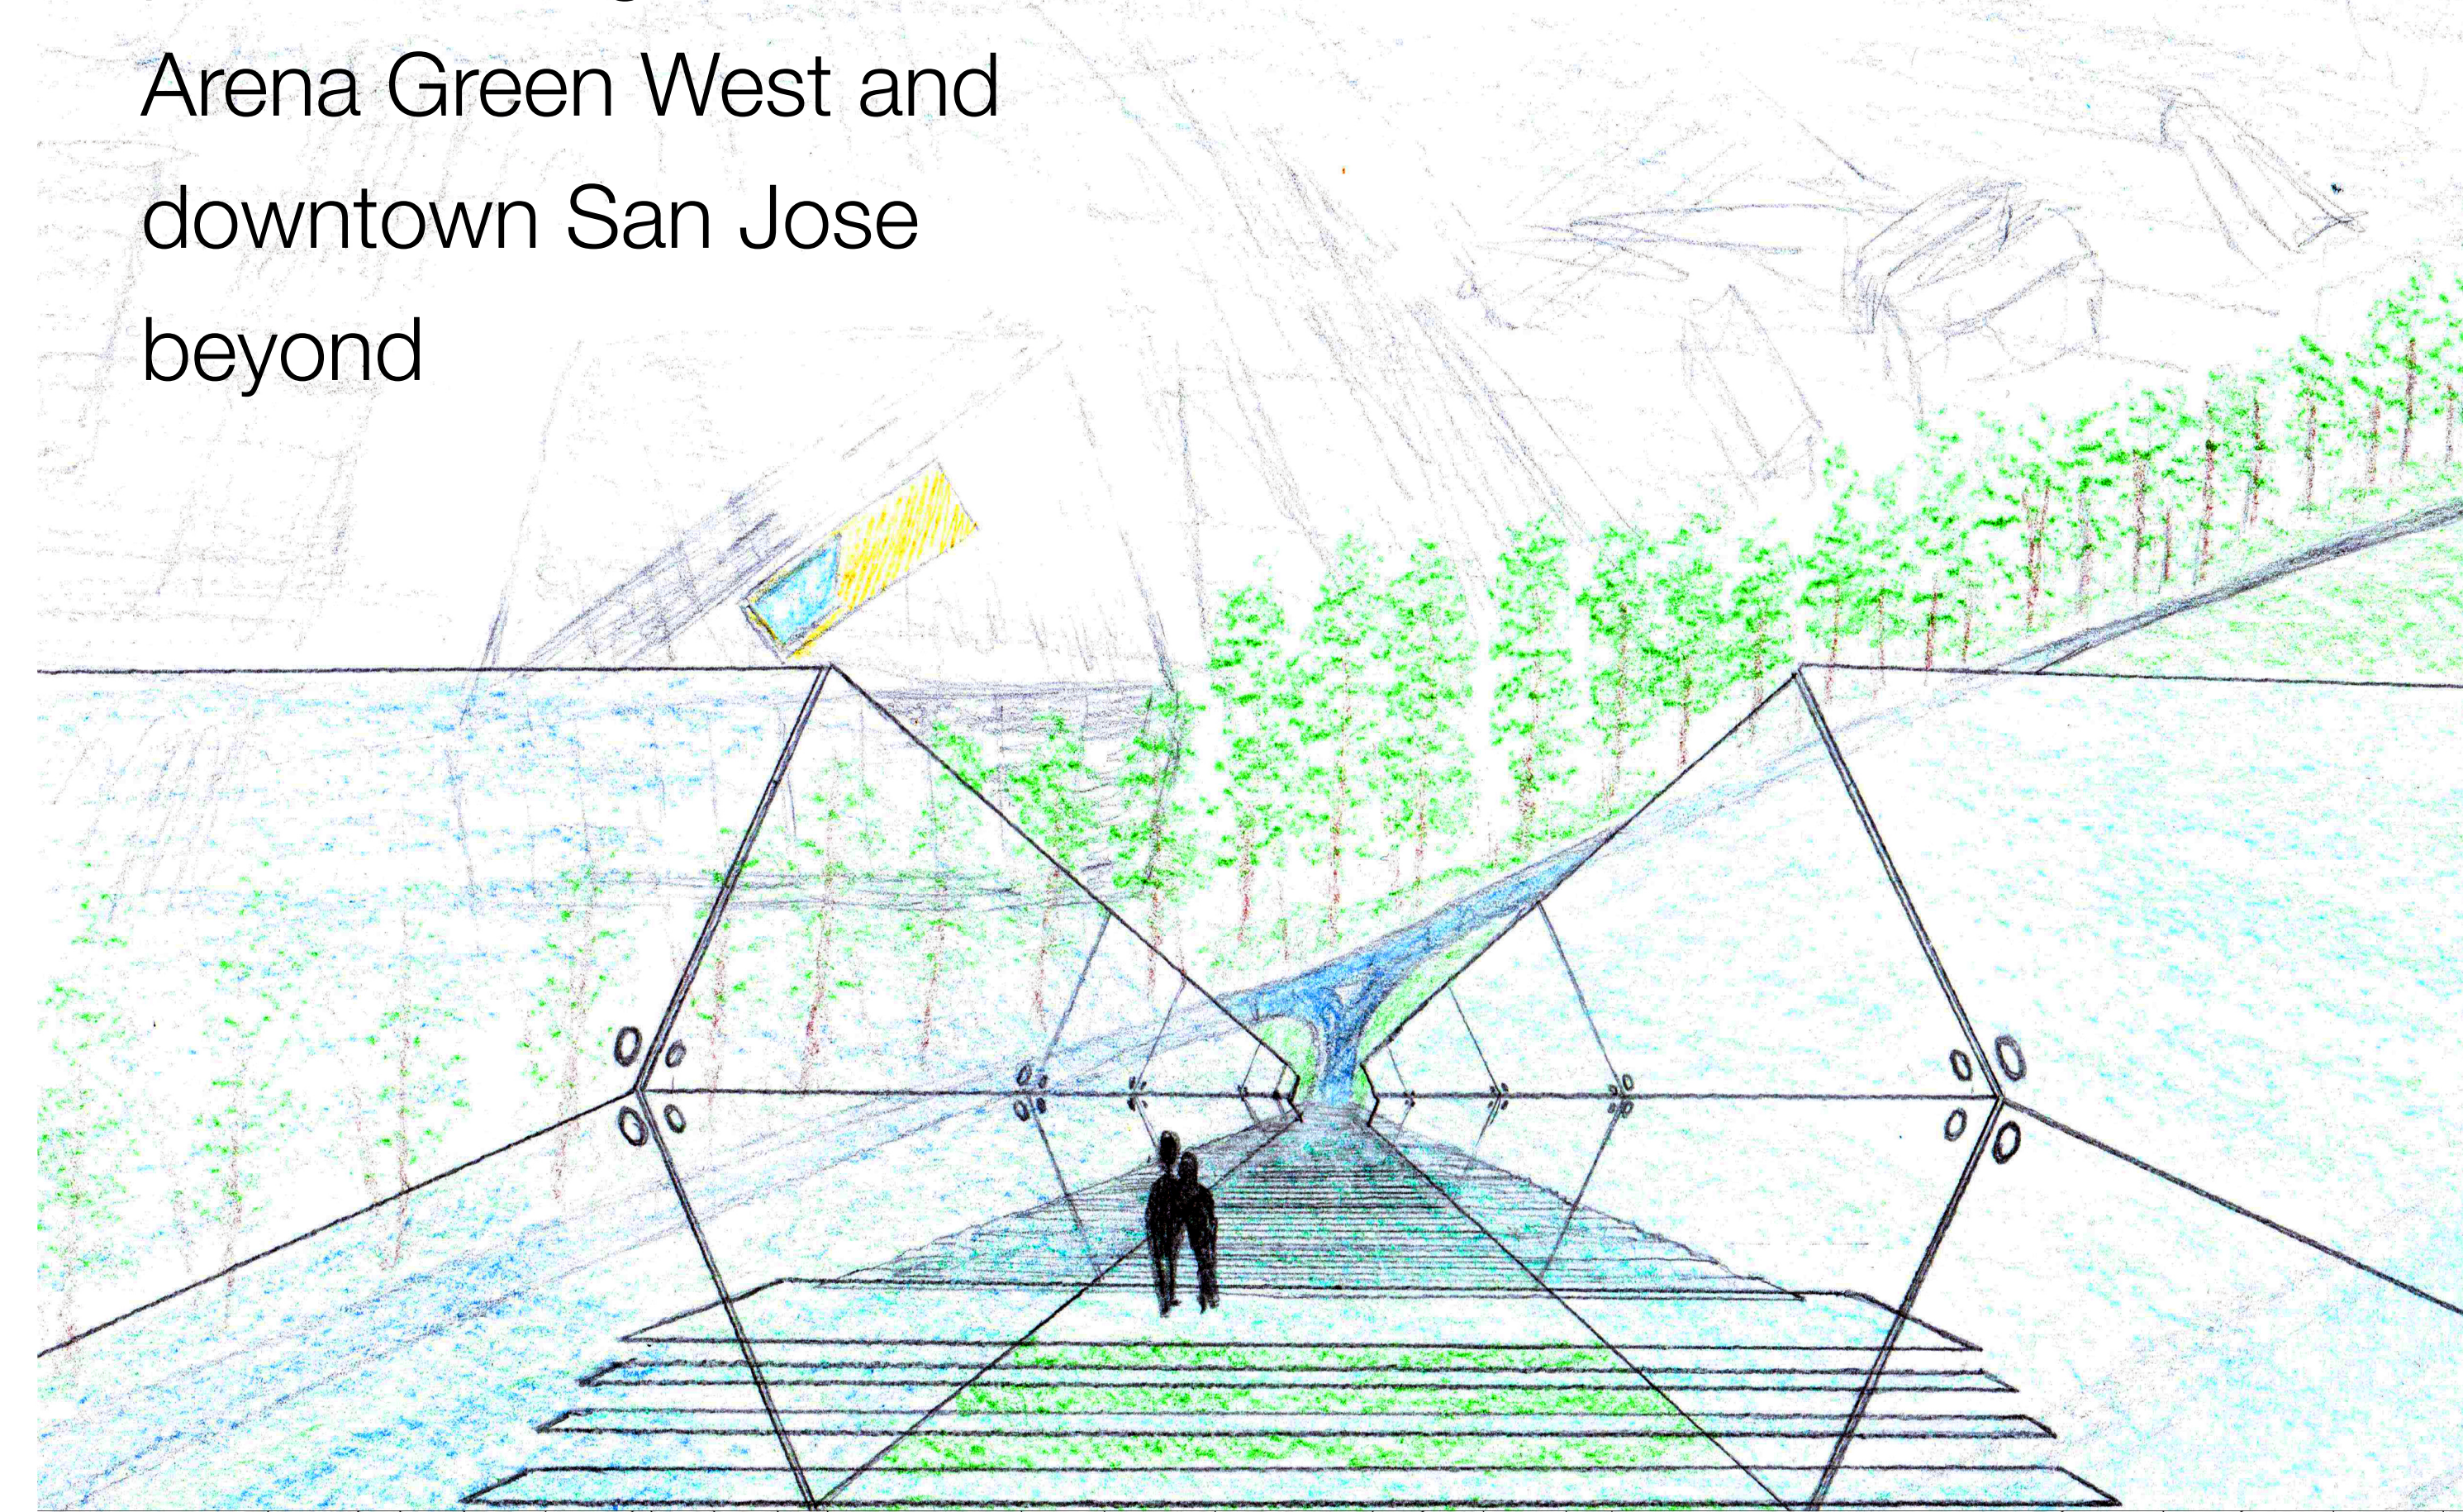

London Shard - Glass as a vehicle for feelings of both freedom and security

Zhangjiajie Glass Bridge - Transparent floor elements as catalysts for a uniquely exciting and harmonious experience

VIEW FROM THE TOP

200ft high vantage point, looking down on Arena Green West and downtown San Jose beyond
