

The proposal creates an Icon based on flexibility and interaction that can be curated by the community over time. Adaptive Icon interacts with its users through ever-changing media projections. At its interior, a ramp spirals as a vertical promenade bringing the city into the structure: a multisensory experience, a place to observe and be observed. People will float above the city on SkyDecks. The park provides a gradient of spaces allowing a multitude of activities. The sites link through pedestrian bridges and walkways organized in a loop system, connecting with its surroundings and a network of trails and parks.
