

1 HELLO WORLD! A global teleport for the low-carbon future

San Jose meets the world

Iconic addition to the city's skyline.

Global network of San Jose-branded experiences.

Connects visitors to exciting virtual destinations.

Uses existing technologies and infrastructure.

The south-west corner of Arena Green Park provides a multimodal arrival experience and vibrant public space for visitors.

2 HELLO WORLD! Local meets global in a vibrant natural setting

Cultural islands Living with nature

Everyone knows the friendly greeting hello. To developers, **Hello World!** is their first computer program. **Hello World!** welcomes everyone yet reflects San Jose's history of inventing the future.

Leadership
Worldwide ambassador for San Jose's people, culture and businesses.

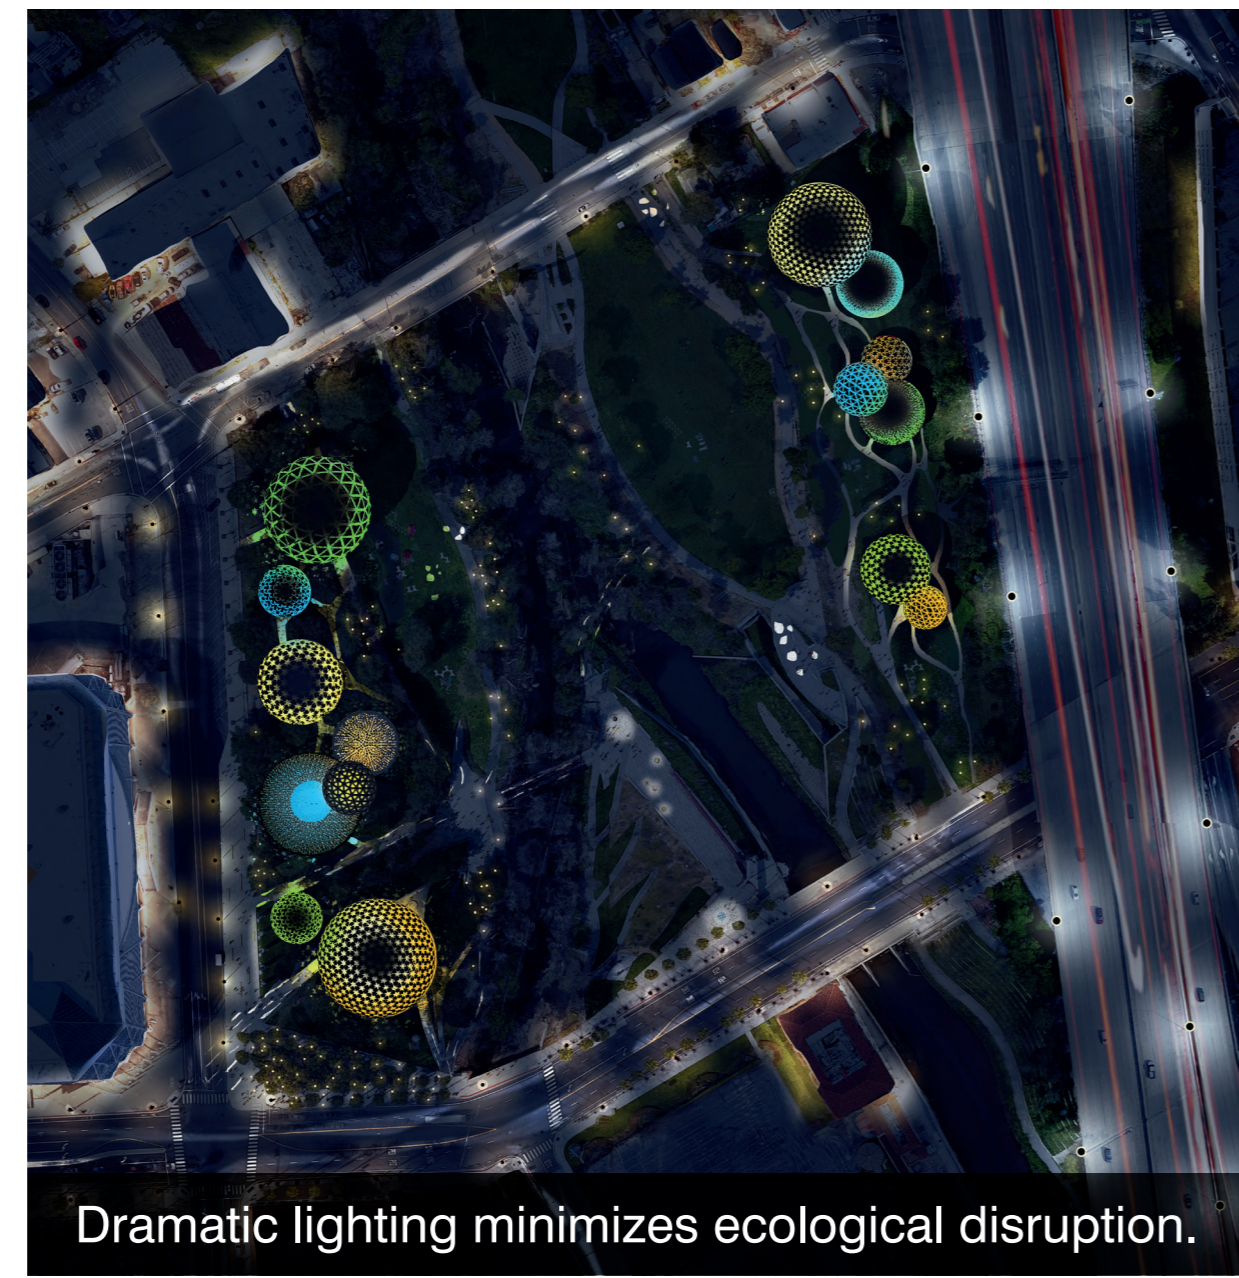

Urban Icon
Enhances skyline day and night with dramatic, low-impact lighting.

Local Service
Pedestrian access to transportation, entertainment and employment hubs.

Arts & Entertainment
Global center for performance, installations and and public events.

Future Proof
Modular construction allows upgrades and flexible repurposing in perpetuity.

Habitat Preservation
Mindful design regenerates riparian environment. On- and off-site power generation aims for net-zero energy impact.

Dramatic lighting minimizes ecological disruption.

Global Ecology
Mass telepresence encourages transportation alternatives.

Financial Sustainability
Capital campaign and flexible business model attracts long-term partners.

Values
Advances humanity by building relationships across borders.

Structure
Translucent skin offers spectacular views of the surrounding area. Oculus adds direct view of the sky.

Circulation and access
Spiralling pedestrian boardwalk organically connects exterior and interior spaces.

Connectivity
Elevated boardwalk extends visitor experience while protecting sensitive ecological zones.

Facade
Birds, bats and insects inhabit the outer shells, and structure conducts airborne moisture to the watershed.

Sensitive landscape response
Plan expands ecological corridor for local wildlife and encourages biodiversity.

Site-through schematic section

Photovoltaic and wind elements integrated into outer shells for energy solutions that harmonize with architecture and the environment.

Riparian habitat expands towards complex allowing visitors to come closer to nature.

Elevated boardwalks provide meandering access to pods within nature-friendly zones.

Small structural footprints minimize impact on habitat corridors and ecology.

Pedestrian friendly perimeter celebrates arrival experience while preserving Five Skaters, Vietnam Memorial and other legacy landmarks.

Elevated pods placed within existing clearings retain trees and allow space for more plantings.
