

AEONS

AEONS represent the timeless, infinite progression of ingenuity and innovation.

Our sweeping duo of circular sculptures stand for humanity and technology and conceptualize that ideas are not born in isolation, but through a dialogue of cumulative knowledge over time which provokes invention.

San Jose was founded on the rock bed of sandstone, the origin of which lies in glass and silica and culminates in the creation of microchips. AEONS harnesses this materiality in its form and stands as a metaphor of time, progress and achievement in Silicon Valley. It is an uplifting perspective that celebrates the confluence of ideas.
