

The curved design mimics the Los Gatos Creek/Guadalupe River

Landscape design will activate and highlight the existing public art and amenities.

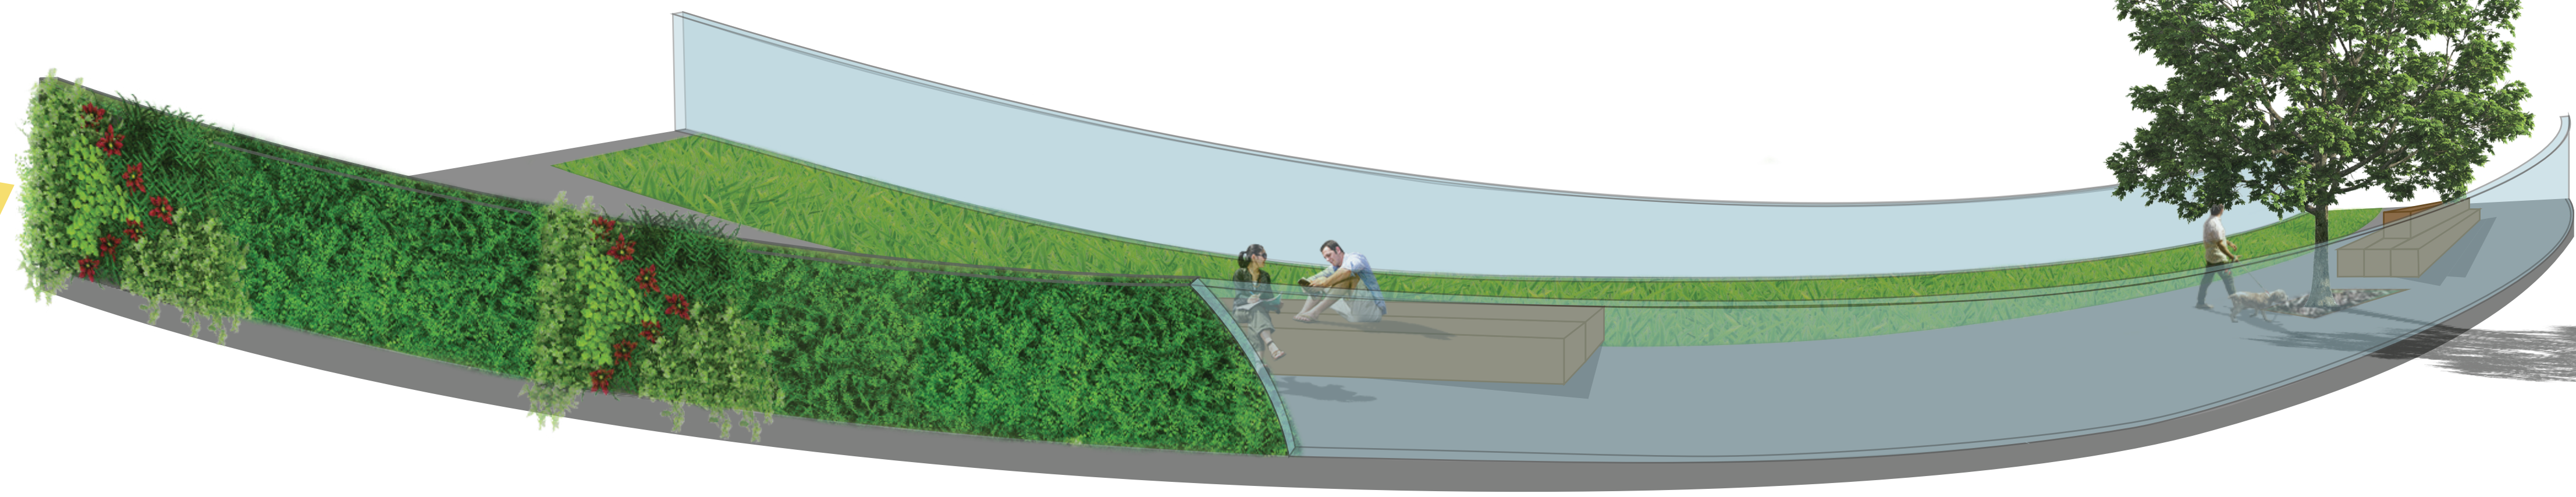

The landscaping of both sections of Arena Green will stay consistent in a streamlined minimalist concept.

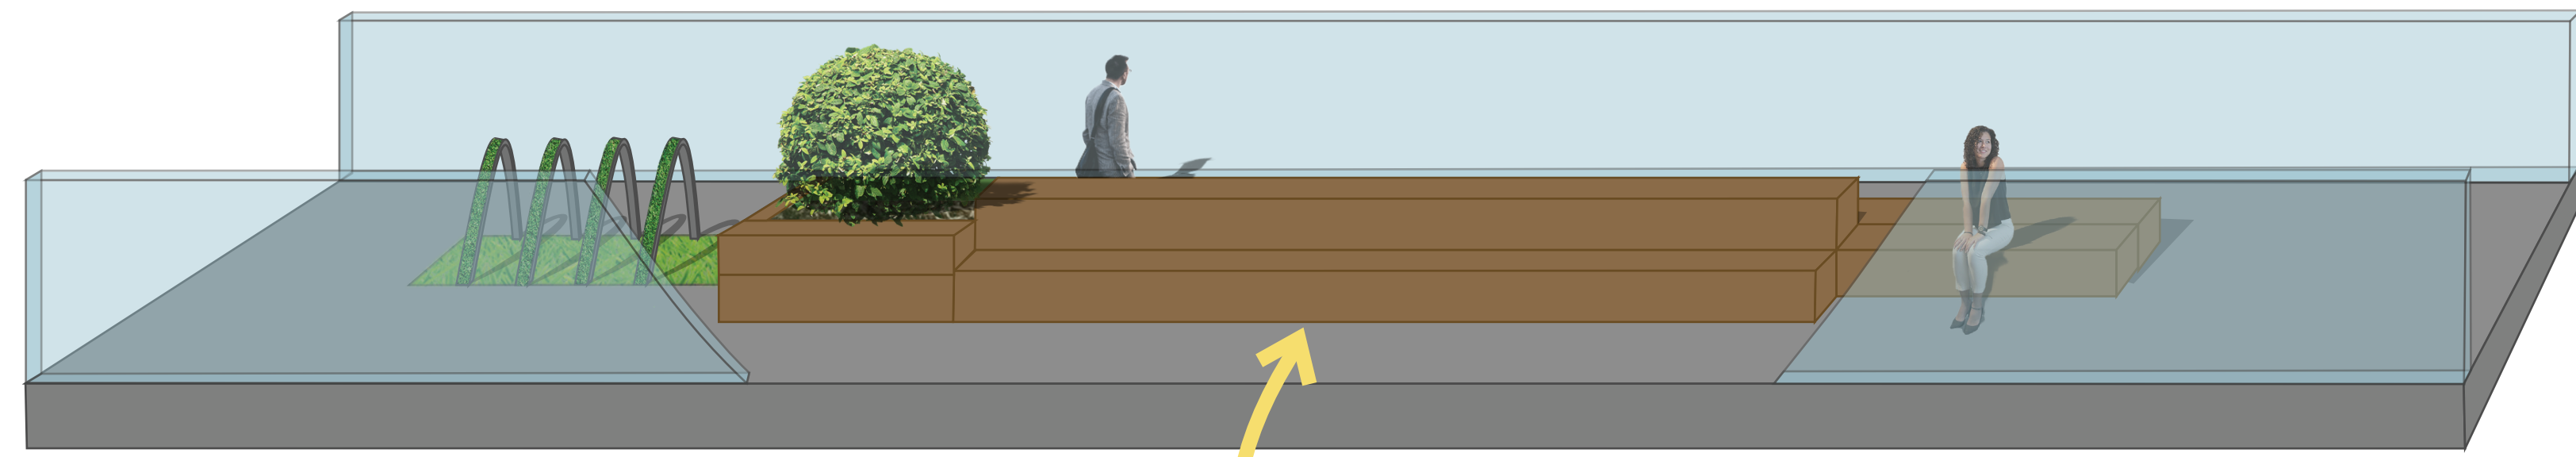

# Side Profile Section Renderings:

Green walls will aid in bringing greenery up into the bridge.

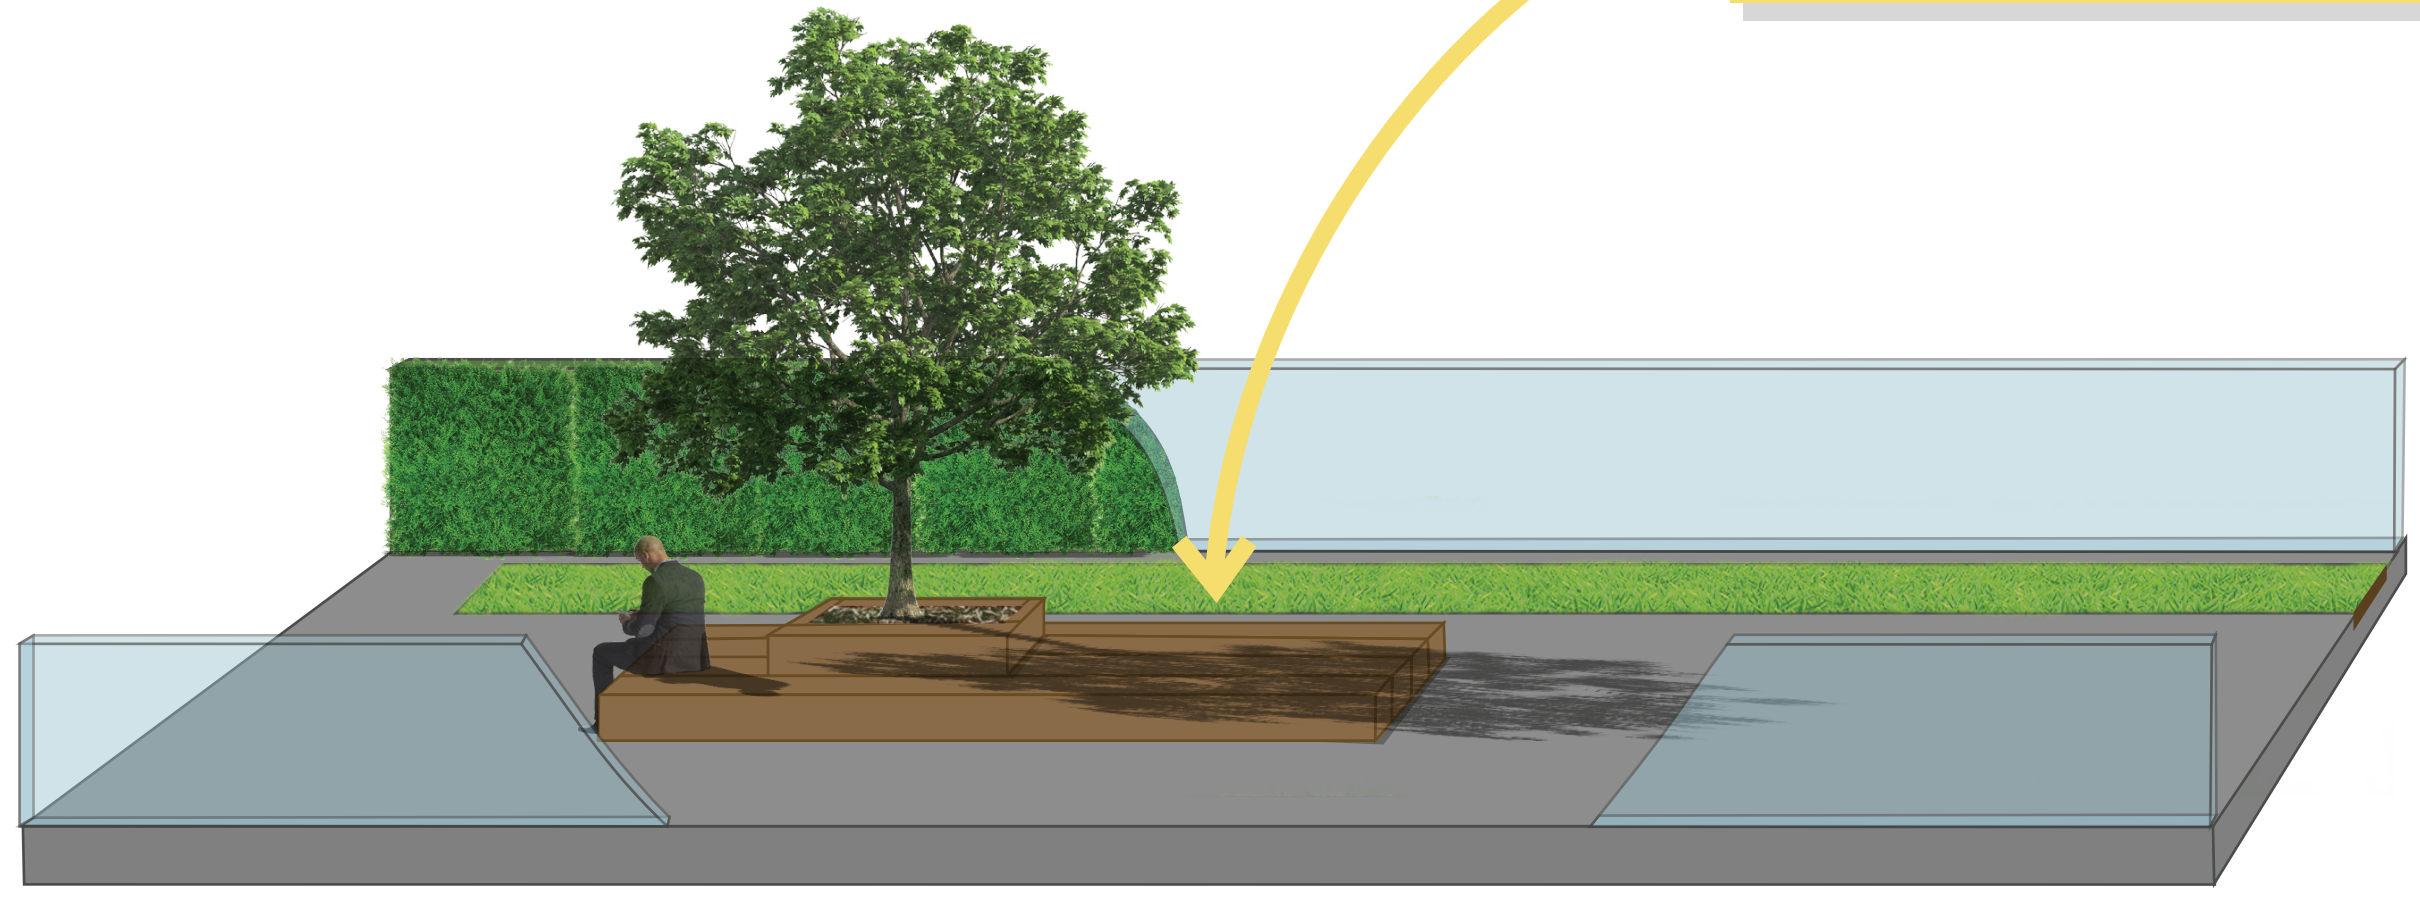

Trees and other vegetation will provide shade for visitors and habitats for wildlife.

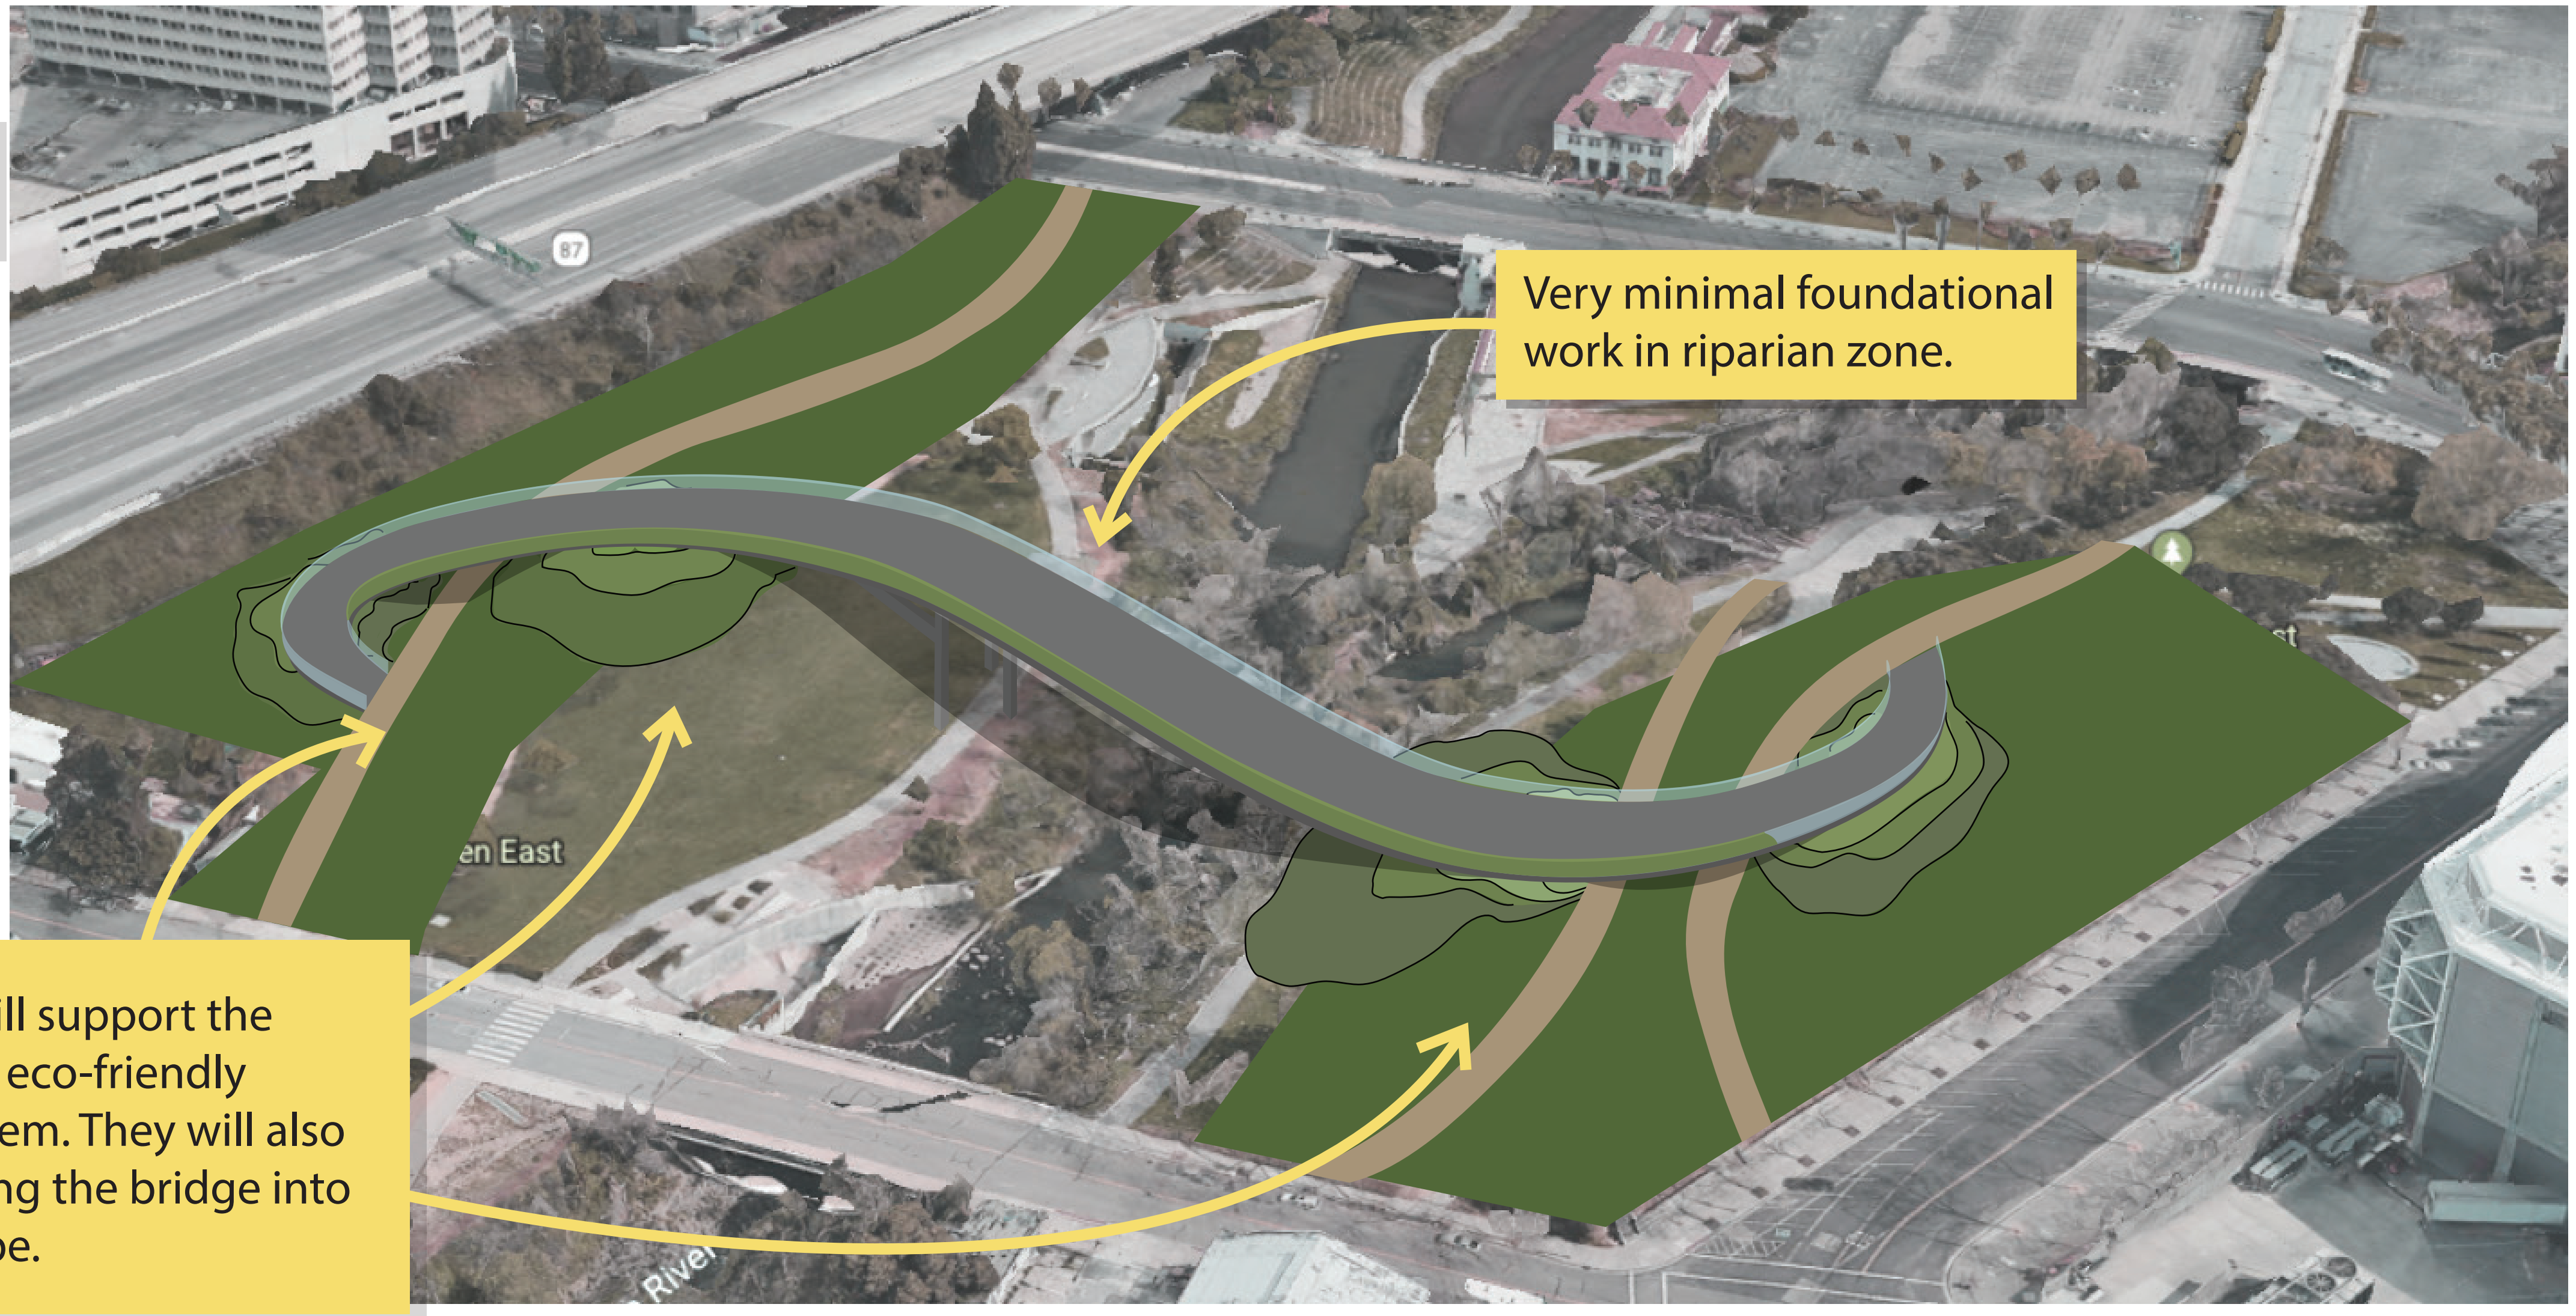

Glass barrier gives a sleek look while not obstructing visitors view of San Jose

Benches for seating and relaxation.

Very minimal foundational work in riparian zone.

Earth hills will support the bridge as an eco-friendly support system. They will also aid in merging the bridge into the landscape.
