# THE LOCATION "PINPOINT" & GENERAL ICON IDEA

**Four Main Parts of the 'Location Pin' Landmark (more details below)**

- **WIFI RING**
- **EXTERIOR**
- **INTERIOR LAYER**
- **ROOFTOP**

-the outer areas (including exterior layer, wifi ring, and hopefully even the surrounding park) will be just as great as the interior area but with a different feel and "vibe" to every area of the landmark.

-The dot in the middle of the location pin will be visible from outside without much exposure to the "interior" (indoor) area activities. The exterior will still be more visible from the outside view

-Can be any color, but preferably red? But may or may not change color on special occasions. Christmas (Green and red), Halloween (Orange and black), Niners football game (Red, black & gold)

# CEILING/ROOFTOP

-Ceiling can be a shape of a dome to complete the roof. May be able to light up and have illuminations on the interior part for special occasions without disturbing the environment.
### Rooftop amenities
- Will have robots or artificial intelligence on the rooftop that interact with people
- Exotic plants( palm trees, bamboo, apricot trees, fruit trees, aloe plants, papyrus, etc)
- Huge telescopes for city and regional views
- Side decks for city and regional views
- Huge telescopes for astronomical views
- Fancy patios and seats
- Water fountains?
- Pools?
- Entertainment venue?

^^ Concepts of dome ceilings, beautiful rooftop amenities with exotic plants, robotics/artificial intelligence.

# WIFI RING

wifi symbol

WIFI RING VIEW FROM ABOVE WITHOUT LOCATION PIN

first block

second block

third block

one "section" of the wifi ring

- Will have 3 'sections'. And each 'section' will have three "blocks", which represent the wifi symbol.

- Each block will have a sensing or engaging illumination detectors including (these are options, not officially designated)
  1. Weather illumination block that detect or sense weather patterns (rain, fog, sunshine, wind, etc)
  2. Social media block where people can engage on platforms or engage in recent newsfeed (such as what you see on snapchat)
  3. Sound block illumination (which can be something cool to observe and distract people from the loud plane noises)
  4. Game block?
  5. Other cool illumination detectors or digital entertainment I can come up with.
  6. Touch screens

# INTERIOR (INDOOR)

The interior may or may not have mini "sections" for certain amenities. (note: this is only an option)
-mini museum sections (emoji section)
-social gatherings sections
-Inspiration section
-exotic indoor plants or gardens sections
-geographical sections
-international wall (where are you from pinning wall)
-phone and laptop chargers
-Profile picture wall section.

# EXTERIOR LAYER

  a. Will have many beautiful designs including (optional ideas for exterior designs)........
 2. Vietnamese style art designs/patterns and illuminations
 3. Italian style art designs/patterns and illuminations
 4. Indian style style art designs/patterns and illuminations
 5. Spanish style art designs/patterns and illuminations
 6. Mexican style art designs/patterns and illuminations
 7. Other international style art designs/patterns (Note: a lot of these international designs are designated to the unique and diverse racial demographics, culture, heritage, history, and population that can be found in San Jose and Silicon Valley.
 8. Semiconductor style art illumination (this represents a beautiful and historic design closely and historically connected to Silicon Valley
 9. Apricot tree or fruit art patterns and designs
 10. Exterior designs will be very detailed and visibility beautiful but the "dot" in the location pin design will still be visible from the outside
 11. Patterns will be subtle from afar but detailed from up close.
