

Ascension Tower

I suggest to build a two-domed Ascension Tower with a total height of 200 feet with anchored crosses, symbolizing both the starting point of time and the infinity of time, in San Jose, at the merging point of the Silicon Valley and the city of San Jose, at your chosen location.

This two-domed Ascension Tower can serve as a symbol of the Silicon Valley and the city of San Jose, as well as a symbol of the World scientific and technological progress of the Silicon Valley ascended to heavens.
