

The design idea is to use the confluence configuration of the two rivers in a “Y” shape, as well as the triangular shape of the Military Memorial. And, Place for bird nests.

Due to the lack of humidity, and the heat that is generated, it was considered to create a core of waterfalls on the four sides of the icon, it is like going up through the water, and to refresh the site. This same water at night will have light that can be monochromatic, or of various colors, generating a movement in the lights due to the fall of the water.
