

“TRANQUILITY PEAK” SUMMARY

Tranquility Peak is designed as a place that welcomes all local and global visitors with harmony, community and social exchange; a landmark that attempts to achieve near zero carbon emissions with cutting edge sustainability and resiliency techniques and technologies. It will be a structure that will attract and safeguard all elements of nature.

Measuring 200 feet in height, Tranquility Peak is inspired by the Sequoias and mountains of Yosemite, with its broad base and roots, standing tall as a sentinel, watching over the community while nourishing its visitors with necessary resources to celebrate community, culture and recreation.
