

Ladies and Gentlemen Competition Committee

The first post expresses a general idea of the urban planning of the Green Square park on the Guadeloupe River and focus according to the color reference in the photos attached to each walkway and the distribution of ideas on both sides of the river to add ideas and revitalize the site and downtown San Jose with various activities and events and daily and annual events.

The second post explains the main idea of creating a large architectural monument that will rise to 200 feet. It is a metal building in the form of arc and wavy pipes. It consists of a steel structure with different materials, metal, and perforated metal. With an explanation of the idea and what expresses the idea in the text written on the publication.

Best greetings.
