

My motivation for this design is to make a place that encourages people to step away from day to day life and be aware of their conscious mind.

An aesthetically pleasing ambience for a leisurely time-out, “**Confluence of Consciousness**” is an ensemble that invokes all senses and inspires to live an extraordinary life. Its ambition is to be a lot of experiences to lots of people, and then, each time a new cognitive realization for the audience.

An icon at Silicon Valley, its centerpiece is Vitruvian Man, a creation of the greatest innovator of all times, Leonardo da Vinci.
