

## **Mind Space, San Jose, CA**

### **Algorithms of Being**

Step 1: An idea is formed in the mind.

Step 2: The structure is conceived by molding handcrafted models.

Step 3: The handcrafted model is 3d-scanned.

Step 4: The model is digitalized, computer aided optimized and engineered.

Step 5: The final structure is 3d-printed in-situ by robots, based on the digital data from the engineering process.

Step 6: The idea becomes reality.

The process describes the direct translation of an idea into a physical reality through digital and automatization technology. The mind is translated into Being in form of this physical space.
