

The Evolving Cloud (project summary)

The Evolving Cloud is a floating icon that generates new spatial opportunities and conveniences for people to experience the site, as well as cultivates the bio-diversities of the natural setting.

It is an infinite loop with structural members woven together seamlessly, as a cocoon made by a silkworm. It is an icon of new technology and sustainable construction.

It invites people to invent countless programs and activities, to foster vibrant lifestyles and cultural diversity. It acts as a new center of public space and will continue involving as an icon for the future.
