

confluence: a united vision of nature and technology

The “confluence” focuses on a vibrant, harmonious, and balanced view at the heart of the city. San Jose is a major urban technology hub. It is a creative and innovative leader of commerce with roots that evolved from an agrarian past. The monumental frame focuses the viewer on the center of commerce and the park’s natural landscape which is fed by the Guadalupe River.

Evolving art opportunities

invite public discourse with high visibility thematic installations inspired by nature and the digital world.

The confluence framework

is a thin structure inspired by a digital screen that dynamically alters the viewer’s perspective with movement and light.

The interactive base hosts a stepped playground, gathering spaces, shaded areas, and accommodates stage performances.
