

Intrado Safety Shield

An unmatched set of tools to keep enterprises protected.

In today's world, workplaces are vulnerable to a wide range of safety threats:

- **Onsite violence scenarios** – from active shooter situations to domestic violence to other serious crimes – demand the fastest-possible response.
- **Threats that can't be stopped by physical barriers** – such as medical emergencies, gas leaks, explosions, and power outages – can catch staff off guard and create chaos for the unprepared.
- **Vandalism, theft, and other security problems** that can happen during or after office hours.

Unfortunately, preventing threats from turning into emergencies is a tough job. How can you protect your workplace from the broad array of potential threats? Intrado Safety Shield is the answer.

The Solution To The Problem

Intrado Safety Shield offers a comprehensive set of tools to help you **prevent, prepare for, respond to, and recover from** almost any kind of safety threat.

Unlike other solutions that only address one aspect of safety, Intrado Safety Shield helps you close safety and security gaps with its complete set of capabilities.

- Complete safety management from one interface.
- Situational data automatically sent to 911.
- Real-time collaboration with first responders.
- Mobile panic button solution for all staff.
- Store safety data (i.e. floor plans, ERPs) digitally.
- Role-specific emergency response checklists.
- Mass notification system integration.
- After-action analysis and reporting.
- Secure two-way texting with safety leaders.
- Safety drill management dashboard.
- Employee information system integration.
- Wellness check notifications.
- Account for all staff automatically.
- Much, much more.

Intrado Safety Shield

Built on the deepest emergency response experience in the industry.

With 40+ years of experience in providing 911 systems, services, and infrastructure across North America, Intrado has capabilities that other vendors simply cannot match.

Intrado Safety Shield helps ensure the quickest and most complete communication at the time of an incident, offering the most streamlined process for all parties.

When you partner with Intrado, you're working with a provider that some of the most demanding public and private institutions across North America rely upon.

Unmatched Experience

- Intrado touches more than 90% of all 911 calls in North America.
- Intrado serves more 911 call centers across North America than anyone else.
- Intrado is a 911 service provider, and as such, is able to provide a direct link to 911 call centers in a way that other vendors cannot.
- Intrado has established, long-term relationships with thousands of public safety, government, educational institutions and enterprises.
- Intrado's communication and safety solutions are trusted by organizations across North America.

Unmatched Capabilities

- Brings together all key data and processes into a single operational view, allowing for end-to-end safety management from a single interface.
- Real-time collaboration ensures 911 dispatch gets the right personnel to the right location at the right time.
- Provides complete situational and contextual awareness to first responders quickly and easily.
- Integration with employee information simplifies emergency response and communications.
- Pinpoint-accurate location data and building floor mapping allows for fast and accurate response.
- Unite safety and security teams across all enterprise locations while simultaneously managing distinct plans and messaging by location, department or roles.
