Selfridges, London

THE PROJECT

Selfridges is one the UK's most famous high-end department stores founded in 1908.

It's Grade II listed flagship store located on London's Oxford Street was named the world's best department store in 2010 and again in 2012.

Buzon UK were commissioned by Prater to supply and install over 200sqm of the Buzon ALUrail and pedestal system to the newly renovated roof terrace area.

The ALUrail installation system offers a complete structure for the raised installation of outdoor spaces. The system can be used for various substrates, 20mm porcelain, concrete and natural stone pavers.

Practical and functional, the ALUrail system can be used where the void is limited. The system, including the Buzon pedestal range starts at 29mm plus offers high load capability, speed of installation and allows for random and staggered paver dimensions.
