

Southbank Place, London

## THE PROJECT

Set in the heart of London, Southbank Place is uniquely positioned to embrace all that the cultural Southbank has to offer.

When complete the development will feature seven new buildings including residential space, state-of-the-art offices and a diverse mix of retail.

This 5.25 acre development also features the iconic Shell building and offers some of the best views in London.

Working with Prater, Buzon UK are supplying and installing the Buzon PB pedestal system to support approx. 1000m<sup>2</sup> of Fresno Falla porcelain pavers supplied by Alfresco Floors.

The ergonomic design of the PB pedestal makes it easy to adjust for quick and effective installation.

The broad head of the PB polypropylene pedestal is specially designed for use with all ceramic paving.

The pedestals are being installed on all apartment balconies on Levels 6-15 and across the Level 16 roof terrace.
