# Batch Integration Engine

Visual designer for system integrations

CRMNEXT's Autonoma Designer lets you integrate your core and other systems with drag-and-drop ease. Set up the integration once and schedule it automatically run on a predetermined basis.

Configure seamless integration.

Quickly build integrations using pre-configured patterns. Simply drag-and-drop integration elements and view integrations graphically.

Real-time alerts and warnings.

Automatically receive emails with detailed logos of all integrations and reasons for failure, should an exception occur.

Automate integration management.

Set integrations to execute manually or at specific intervals.
