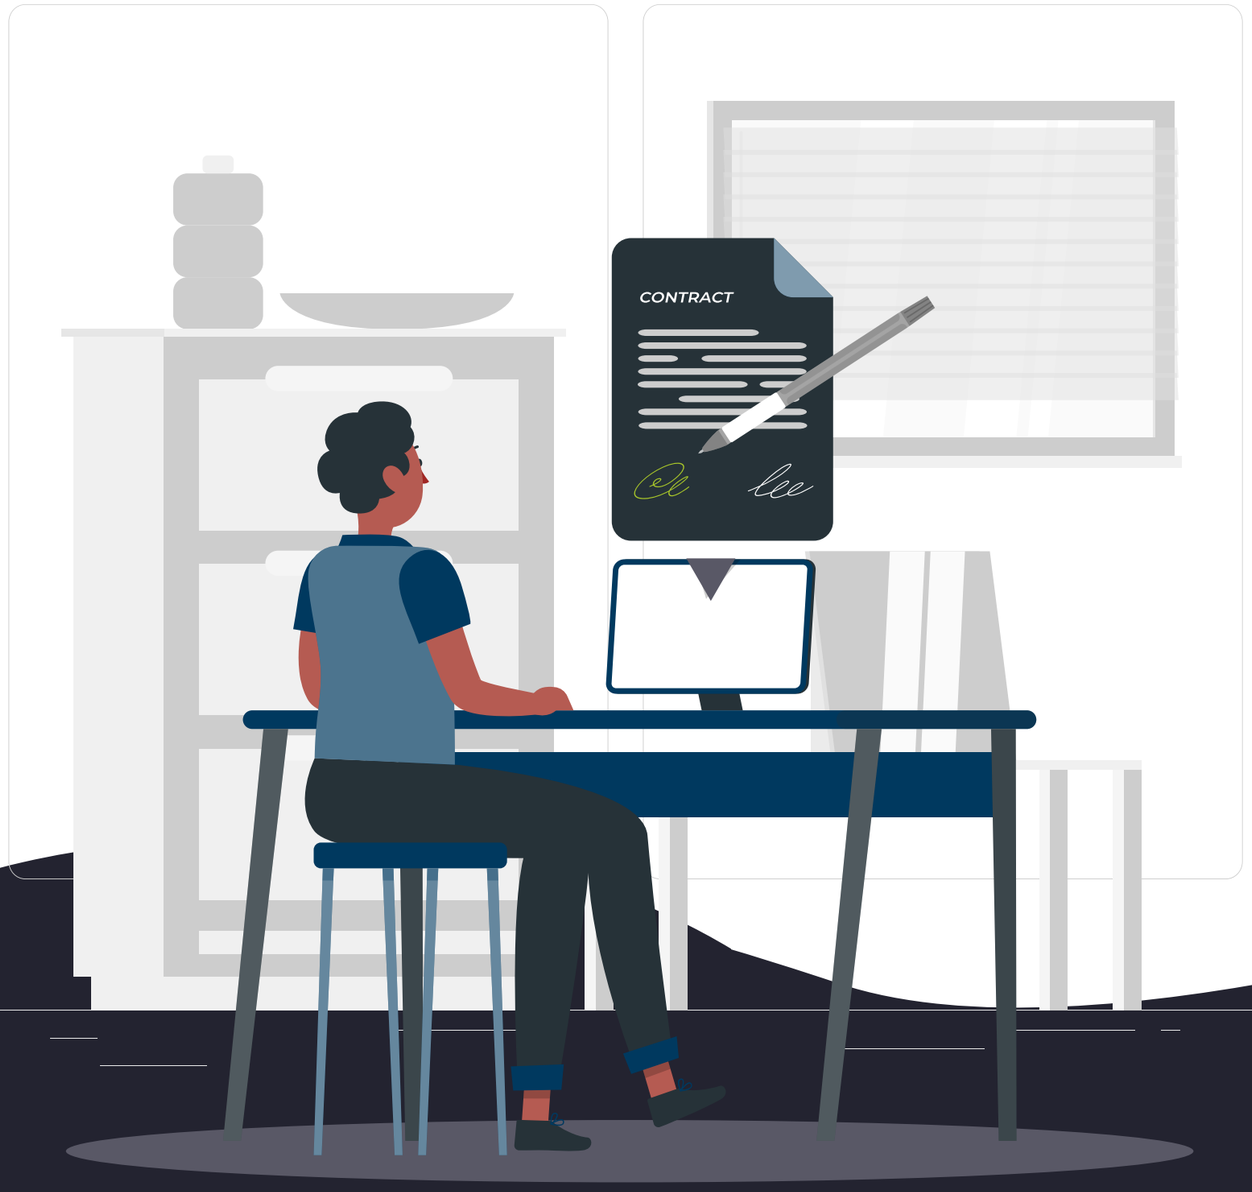
# 6 ways CLM is improving legal operations

# Stronger Contracts

Author and execute strong contracts, aligned to the enterprise playbook, with the help of standardized templates and clauses.



# Streamlined Approvals

Store, review and approve contracts easily. Collaborate with multiple stakeholders on requests, negotiations and amendments.

# Improved Visibility

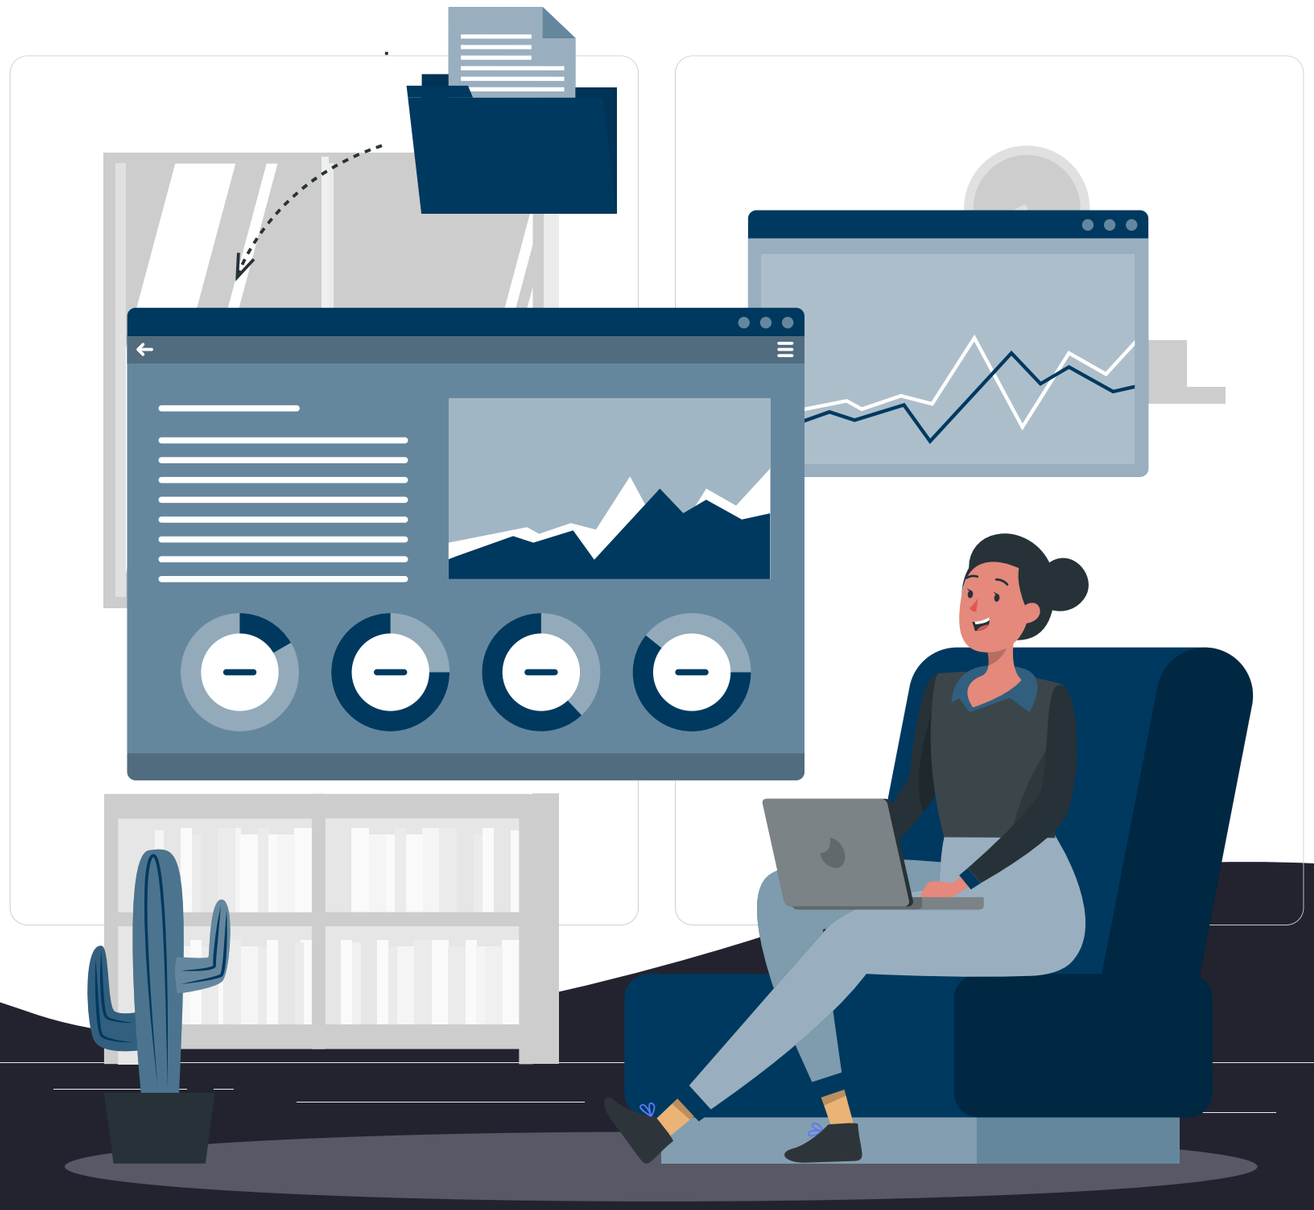
Gain real-time contractual insights to improve compliance and guide business decisions. Establish benchmarks and KPIs and improve processes.

# Risk Mitigation

Compare third-party contract templates with the enterprise playbook and instantly identify clauses, deviations, and risks using AI.

# Enhanced Productivity

Timely reports on incoming tasks and insights on contract amendments across the lifecycle can be a part of the inbox in a jiffy.



# Deeper Insights

Identify potential risks with scoring and mapping tools that analyse potential risk patterns from within contracts and give organizations the flexibility to choose their way forward.
