

# NFTs DONE RIGHT

## NFT MARKETPLACES POWERED BY SIMBA

Your brand, your community, your Non-Fungible Tokens (NFTs) all controlled and customized by you. Unlock the value of your digital assets and NFTs for the people who love your brand!

The SIMBA's NFT Marketplace is a white-labeled NFT buying and selling platform dedicated to your brand. Our turnkey, end-to-end solution creates an immediate, new revenue stream. Marketplaces are built on the robust SIMBA Platform which ensures unparalleled security and integrity.

### MINTING

**ALL INCLUSIVE:** SIMBA holds a full line of services for a successful launch. From engineering and project management to marketing and customer success, we are uniquely positioned to build and launch white-labeled NFT marketplaces.

**INTEGRITY:** SIMBA solutions differ from the masses by ensuring NFT metadata is securely stored on chain. The metadata additionally contains a cryptographic hash of the media, providing a unique fingerprint of the asset. Our approach makes authenticity irrefutable and failsafe.

### BLOCKCHAINS

SIMBA's Platform, powering the NFT Marketplace, currently supports nine blockchains with many more in the pipeline. We even support minting NFTs on Avalanche, a leading energy-efficient public blockchain. SIMBA's Platform is built with sustainability in mind. Greener, faster, or less expensive blockchains can easily be added when they become available.

### THE "POWERED BY SIMBA" PROMISE

- Secured with Integrity
- Future-focused
- Consumer Friendly
- Dedicated to your brand
- Immediate revenue stream
- Turnkey end-to-end solution

## THE NFT MARKETPLACE

### BUILT FOR THE CONSUMER

Our Marketplace solution was designed with consumer-friendly NFT purchasing in mind. Accounts are simple to create and customers do not need a crypto wallet to purchase. Payment methods expand beyond crypto to include accessible forms such as credit cards and ACH. SIMBA uses Stripe for payments and Plaid for verification with new payment and verification methods on the roadmap.

### DIFFERENT WAYS TO SELL

Sales can be structured in many ways including One-of-a-Kinds, Collections, Series, Limited Editions, or Packs. New features and offerings will be routinely added.

Selling NFTs can be done through a buy now price, traditional auctions, or blind auctions.

Our platform also includes advanced engagement metrics and customer insights enabling you to know what resonates with fans. You can also incorporate existing customer identity systems and tracking.

### FUTURE-FOCUSED

SIMBA's comprehensive blockchain platform and expertise ensures a robust roadmap that extends far beyond NFTs. Customers can benefit from our innovation for years to come.
