WHY SIMBA
SHOULD BE YOUR
BLOCKCHAIN
PARTNER

THE WEB3 OPPORTUNITY

Blockchain is still in its infancy. We are only at the equivalent of the dial-up stage of the Web3 revolution. Just like with previous Web 1.0 and Web 2.0 transformations, there will be massive opportunities to improve business processes and solve wicked problems.

> **Whatever people need to do on the blockchain, SIMBA will be there with the preferred platform on which to do it.**

WHY SIMBA CHAIN?

SIMBA Chain builds the portable, simple interface that brings Web3 to life for the rest of the world. SIMBA leads the way as the preferred Web3 pathway for asset digitalization. How do we do it? We are the easiest, portable, most powerful platform to create smart contracts and NFTs to interface with any blockchain

SIMPLE APIs
Graphical smart contract interface and Layer 4 low-code development platform

UNCHAINED
Develop for any blockchain. No chain "Lock-in." Port any app to any blockchain

EFFICIENT
Dynamic API to interface with smart contracts. All data is searchable.

GREEN AND SCALABLE
Transfer to a greener chain when new options are available

SIMBA'S STORY

SIMBA Chain was born as a solution to do secure messaging in the blockchain for the DoD. From there applications have been created for supply chain for Boeing, food tracking and verification for TOKs, certification and asset management for state DMVs, NFT marketplaces for sports franchises and clubs, among many others.

Since our origins are deep in the DoD, we've had to deal with real-world problems from day one. Now even in NFTs, SIMBA provides differentiated value.

> **In short, SIMBA is the leading pathway to the Web3 world.**

SUPPORTED BLOCKCHAINS

With SIMBA you're not locked into a specific blockchain. Our API lets you pick from any of our supported blockchains, and gives you the freedom to transition in the future. Many more chains are coming soon.

Ethereum	Quorum	Stellar	RSK	Avalanche
Binance	Hyperledger Fabric	Hyperledger Burrow	Hyperledger Sawtooth	Future Blockchain Leaders
