

Accelerate High-Performance Team-Simulation

Do you want to create an organization that thrives on excellent communication and collaboration? Sign up for this Online Team Simulation. Experience Agile. No formal training, but an online simulation that actively challenges your creativity, adaptability, collaboration, and communication skills.

Fully digital and
COVID-proof

Learn what Agile is by experiencing it. Suitable for:

- > 3 to 18 teams
- > 12 to 150+ people
- > Teambuilding
- > Organization-wide

What is it?

The High-Performance Team Simulation is an online teambuilding and collaboration game developed by experts in empowering autonomous teams in large enterprises. It is a full-day program in which theory and practice merge seamlessly. We simulate a theme park's construction, complete with planning, execution, review, and retrospective.

Why?

Organization-wide collaboration is complex; different departments speak different languages, which makes communication and collaboration between, for example, business and IT difficult. This simulation is developed to provide a solution. Learn to collaborate in short iterations more effectively and use the Agile philosophy to improve continuously.
