

Trolley and optional holder

The UV Smart Trolley is intended to enhance the overall portability of the UV Smart D25 and provide a stable base for the placement of the D25. The trolley has the option to add an additional bracket to store common disinfection items like hand sanitizer or disinfection cloths. The trolley also offers the ability to mount the D25 to the top plate to ensure a rigid and firm connection between the trolley and the D25. The top plate of the trolley has a cut out at the back to make sure the power cable of the D25 can easily be attached. Lastly, the device features medical castors with breaks, to make sure the trolley does not move during usage of the D25.

Order details:

Product name	Product code
Trolley	UVSD25T
Product name	Product code
Holder	UVSD25H

Dimension:

TROLLEY

No D25 attached

Dimension (mm): 600x500x893 (WxDxH)
