

Choose North America's largest
and fastest growing weigh
station bypass service.

Covering more weigh stations and inspection sites than any other bypass service, Drivewyze[®] PreClear is also the only bypass service integrated into in-cab devices from trusted technology leaders and on smartphones and tablets.

Drivewyze is available on devices from: GEOTAB, ISAAC, ORBCOMM, Omnitrac, Platform Science, Rand McNally, Switchboard, Transflo, Trimble and on mobile phones and tablets through Google Play or the App Store.

Why Choose Drivewyze?

- More bypass sites than any other program
- Works at scales and mobile sites
- Integrated into leading ELDs - no transponders to manage
- Reveals your hidden losses from unplanned weigh station delays
- Outstanding customer service

About Drivewyze PreClear

Drivewyze PreClear rewards your hard earned safety score by providing bypass opportunities at fixed weigh stations and mobile inspection sites - right on your in-cab device, eliminating the need for transponders.

- **Save time and money:** No stopping or slowing at scales saves fuel and on-duty driver time.
- **Deliver loads faster:** Bypassing scales keeps drivers on the mainline.
- **Great for recruitment and retention:** Drivers are 3X more likely to work for a company that provides a weigh station bypass program.

Free Weigh Station Activity Report

Interested in learning what your real costs are due to unplanned delays at weigh stations?

Thanks to the free Drivewyze Weigh Station Activity Report, you can now see exactly what costs you are incurring due to unplanned weigh station delays.

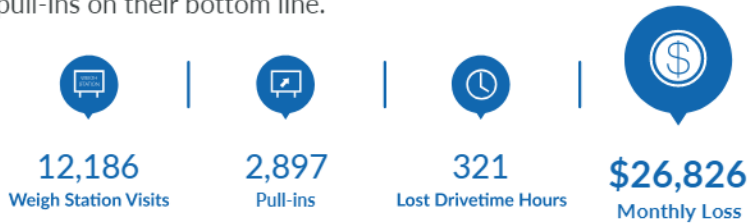

The free Weigh Station Activity Report Tool collects real-time data when your trucks are pulled into weigh stations. It shows you the real losses due to those delays, as well as an ROI report on savings you could realize from the Drivewyze PreClear bypass service.
