

Helping health care providers deliver a superior patient experience.

The Curago Health Platform allows you to:

- Automate Patient Registration
- Transform Patient Communication
- Improve Quality of Care

Curago Health has developed a platform to help you transform your patient's experience.

The Curago Health platform is an affordable solution your patients will appreciate. For less than the price you pay for your appointment reminder system, you can implement and have access to the entire Curago Health Platform.

Curago Health features that improve the patient experience:

- iPad and mobile Patient Registration
- Kiosk Check-in Patient Registration
- Appointment Reminders
- Eligibility verification
- Two-way text messaging
- Branded Patient App
- Physician back-office App
- Medicaid Enrollment outreach
- Follow-up outreach to close gaps in care

Meet patients where they are and stay with them throughout their entire care journey. How else will you close gaps in care and help your patients and health center thrive?

With Curago Health, you can:

- Increase the speed of patient check-in
- Reduce no-show rates by up to 70%
- Communicate with patients in their native language
- Improve Quality Scores
- Increase provider satisfaction
- Increase patient satisfaction

Curago Health Solutions

Curago Health Web App

The Curago Health Web app allows you to manage patient registration, develop custom forms and surveys for discrete data collection into the EHR. The app provides easy outreach and communication with patients via text or email. Our solution allows patients the convenience of completing registration on their phone.

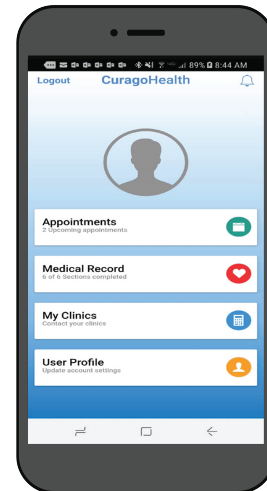

CuragoKiosk

Automate the entire check-in and patient registration process. The CuragoKiosk allows you to discretely gather important patient treatment data into the EHR before their appointment or at check-in. Data may include demographic, insurance, pharmacy, prior medical history, HEDIS data and PHQ9 data.

CuragoDocs

Sometimes patients come in for a simple well visit, but the visit changes and more data must be collected. When this happens, the CuragoDocs app can be used to collect the necessary data right in the exam room with the CuragoDocs iPad app. With CuragoDocs, you can improve physician satisfaction by moving laborious data entry tasks from the physician to the patient.

myCurago

Empower your patients to take charge of their healthcare with the myCurago patient app. myCurago features are accessible via the patient's smartphone and allows them to view their upcoming appointments, review medical records and by the summer of 2020, they will be able to view their medications, lab results, diagnosis and care plans.
