Please share with your student success team, department and program chairs, and curriculum committee

Join CIC's Online Course Sharing Consortium (OCSC), a community of independent colleges and universities combining the benefits of small with the advantages of scale.

*Sometimes your institution simply can't offer every course every student needs at the moment when they need it. **IMPROVE RETENTION** and degree completion. Help students maintain academic progress by enrolling in pre-approved courses offered by trusted partners with similar educational values. Remove barriers to transfer of credit and financial aid through consortial agreements.*

*Make your institution's underenrolled courses available to more students. **GENERATE REVENUE** and **INCREASE ENROLLMENT** by offering seats in select courses to consortial partners through OCSC.*

HOW IT WORKS:

Your institution can enroll its students in courses offered by OCSC partners, offer its own courses through OCSC, or do both. Consortial agreements facilitate the approval of courses by your campus's usual process, easing the transfer of credit and financial aid. Enrollments in your courses from OCSC partner institutions generate revenue and bring diversity and vitality to the classroom experience.

5,771

Number of courses available through OCSC in Fall 2021

“Retention was really our number one goal in joining OCSC.... What are the barriers? Part of it is failing a course, getting behind, changing a major, and all the things that prevent students from staying on track. It was critical that our retention rate went up, not only for ratings but as a promise to our students and their parents.”

**—MARY-BETH COOPER,
PRESIDENT OF SPRINGFIELD COLLEGE**
