

AVID Secondary

Regardless of life circumstances, AVID students overcome obstacles to achieve success. They graduate and attend college at higher rates, but more importantly, they can think critically, collaborate, and set high expectations to confidently conquer the challenges that await them.

EQUITY

AVID challenges belief systems and practices that keep students from achieving their full potential. AVID opens access while providing students with the tools to be successful.

TEACHER EFFECTIVENESS

Every teacher can make a lasting, positive impact. AVID provides strategies and activities to create deeper connections with each student.

LEADERSHIP

Principals collaborate with teachers and counselors to utilize data to challenge existing paradigms and address the roadblocks to student opportunity and success.

STUDENT LEARNING

No one can predict the future, but through a focus on soft skills, AVID helps prepare students to thrive in the world that awaits them.

EXPERIENCE AND IMPLEMENT AVID SECONDARY

- Via the AVID Elective, across grade levels, or Schoolwide by training staff across the campus
- Through Site Teams of 8 or more engaged in 3 days of AVID professional learning
- Using lesson plans, high engagement activities, and educator validated tools
- And receive a means to measure and refine your approach at the school and district level

“We’ve got to become much, much, more focused on how to engage young people. AVID does this better than any organization I know.”

—Dr. Pedro Noguera,
Distinguished Professor, UCLA
