

Studio Private

Delivering high-end production from remote locations

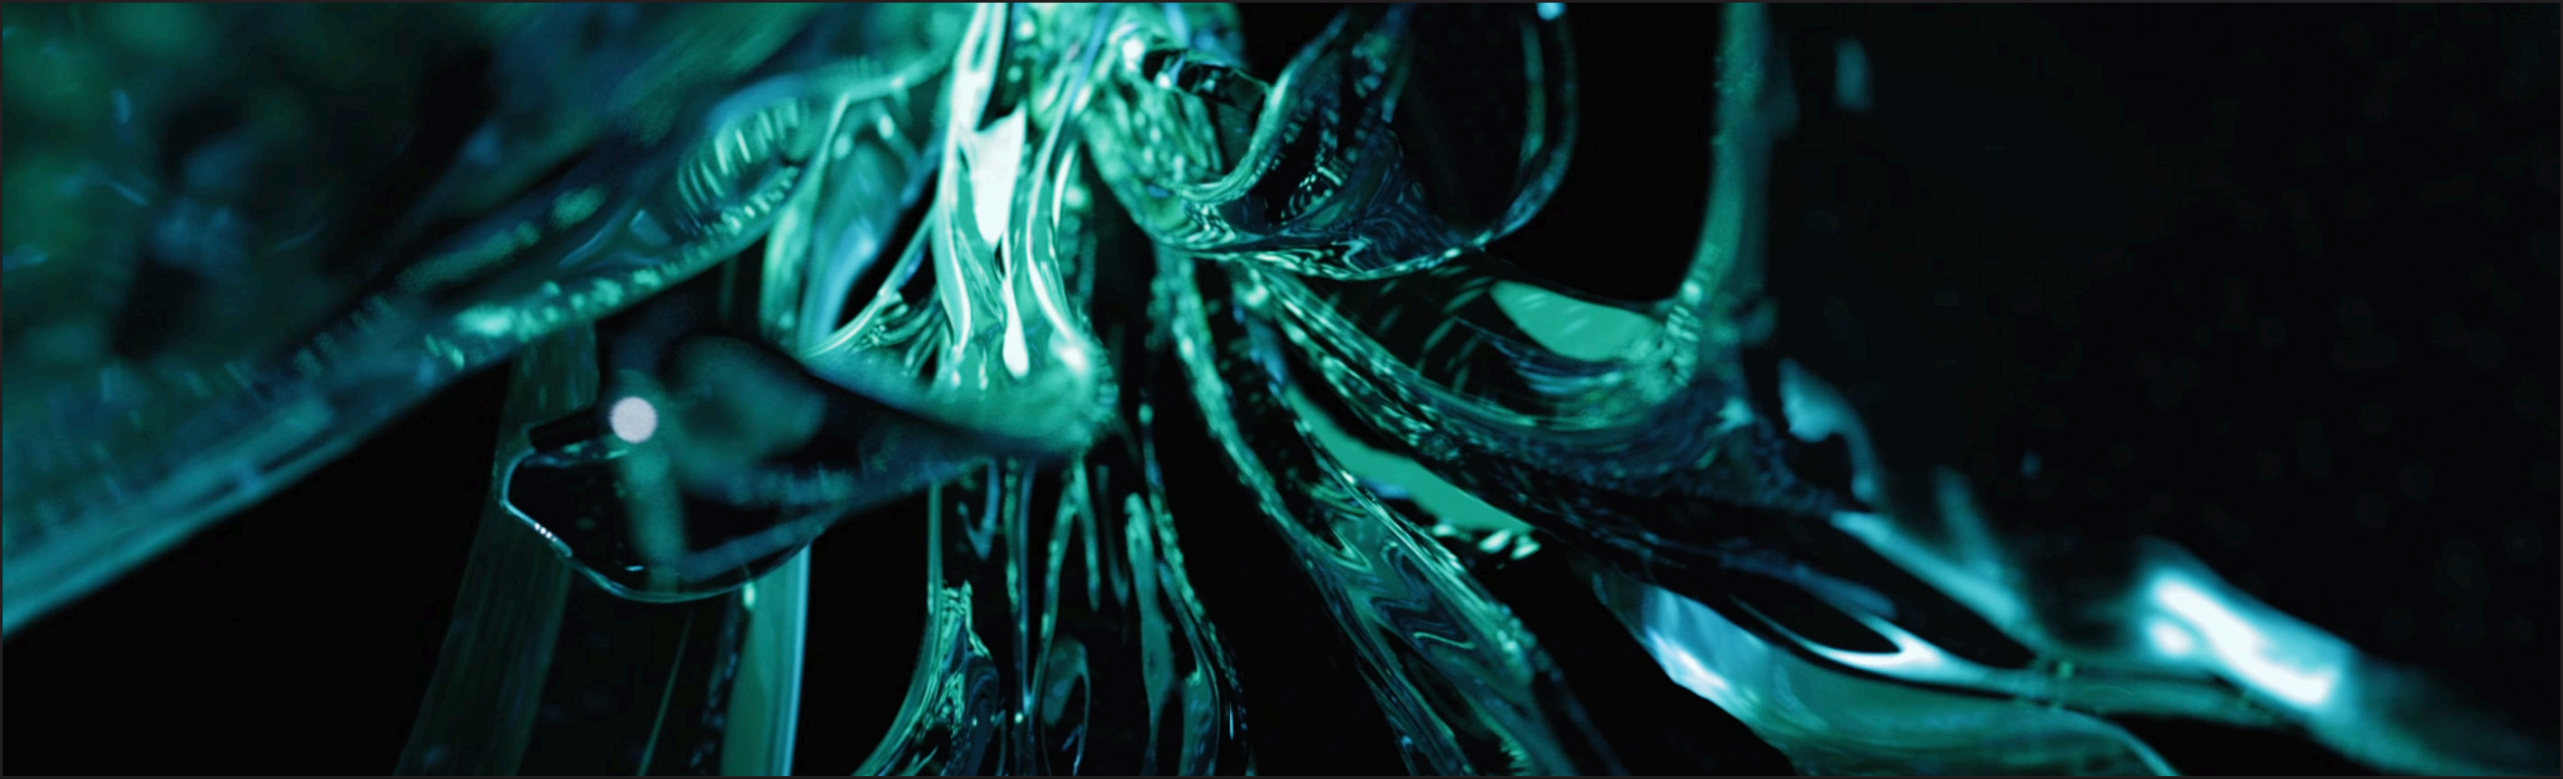

While navigating the new world, the SP team have successfully delivered numerous exceptional projects from remote locations.

We have organised our teams to operate seamlessly through our sophisticated workflows. These new elegant systems have allowed us to deliver outstanding work to customers and collaborators.

"Thank you, truly, for everything! It has been an absolute pleasure working with Studio Private!"

Katie @ Cocollective

Technology

We have selected remote working technology to provide the best quality and the easiest client set up for any service we provide. Using Teradici PCoIP remote desktop allows us to leverage the full power of the studio and keep data secure whilst streaming only pixels too remote artists.

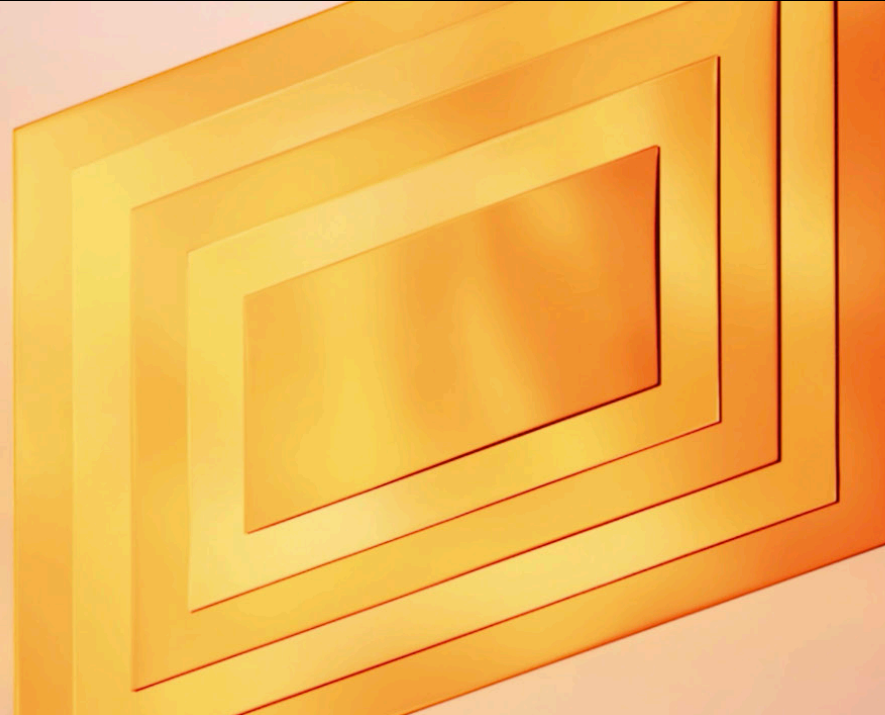

We have also set up AWS cloud computing platform with virtual workstations and cloud storage to expand our remote workforce seamlessly.

Communication

When it comes to the organisation we have created seamless workflows that support our team and clients. As well as setting up direct phone lines, our team are constantly connected via range of platforms.

We have successfully delivered a large number of remote jobs including CGI, VFX, Grade, Edit and Retouch.

Safety & Security

We understand that privacy is important. With every job we take on our team ensures your work is protected every step of the way. We have been fully audited and approved for top level secure project working as well as having an end-to-end encrypted remote working system.

We have also been focusing on the safety of our team going above and beyond the UK Government's advice to ensure every member is set up to work remotely. While we are encouraging remote working our employees and clients still have the opportunity to work and visit the studio if they wish to do so. We are adhering to both the APA 'Office Guidelines' and the Governments guidelines and have set up hand sanitising stations around the office.

Results

Despite the challenging times we find ourselves in across the globe, we have been able to deliver multiple projects across CGI, VFX, Edit, Retouch and Edit by working remotely. We are certainly missing seeing our clients in person but are looking forward to welcoming them back into the studio when it is possible to do so safely. We hope to be able to deliver our luxury in-house client experience sometime in the future!
