H

Ergonomics and comfort

Dental chair attached to the hydric box, with lateral movement and nothing underneath the chair. This provides better and more working positions and gives a sophisticated look to the dental practice.

Rotating porcelain spittoon bowl

Wireless foot pedal included

Spittoon box can be turned away 70° for better access to the patient from both sides

Choose between two speeds of the patient chair

Assistant arm adjustable in height and with capacitive keyboard

Adjustable in position, removable and sterilizable instrument holders

Self-compensated instrument tray arm with gas piston and without additional brake, which allows you to position the main instrument tray and lock it automatically into place, without doing anything, without having to press any button.

Very smooth movement of the instrument arm

Ergonomic handles on the instrument tray for better handling

Hygiene

Spittoon bowl, faucet and cup holder are removable and can be sterilized

Standard suction hoses removable and thermo disinfected.

Designed for easy cleaning and disinfection

Silicone mat on instrument tray is removable and sterilizable

Technology

Chair movements available on control pedal and keypad (principle and assistant)

Possibility of regulating the intensity of the lamp from the screen

Touch expert PRO™

7-inch color multi-touch screen, based on Android, orientable, with IPS technology and easy to use.

Indefinite number of user profiles with their own settings

Identification of the clinic, the date and time and the possibility to add the clinic's logo on each screen.

Upload of X-rays and photos, visualization of images, videos and the unit's manuals

Programming of scaler work parameters in ENDO, PERIO, SCALER, working range, and light intensity in the instruments. Adjustment of the operating parameters of the micromotor (with ENDO functions): torque control in Ncm, direct or reverse rotation, irrigation mode (spray, torque control in Ncm, direct or reverse rotation, irrigation mode (spray / water / air) , type of contra angle and two types of speeds: from 200 to 40,000 rpm and from 100 to 4,000 rpm.

List of potential options and upgrades

- Standard
- Upgrade (only 1 option can be selected)

- Optional (only 1 option can be selected)
- ⊕ Optional (without any restriction)

Doctor's instrument tray

- ANGLED INOX MINILIGHT 6F SYRINGE [1.8M] ●
