

# CalcuQuote Uses securityprogram.io to Meet Industry Security Requirements

## Overview

CalcuQuote moves the EMS industry forward with process and technology expertise to solve complex problems. CQ's flagship product is QuoteCQ - a comprehensive Quote Management System for high-mix, low-volume Electronics Manufacturing Services (EMS) companies. By integrating with major component suppliers and using custom labor profiles, CalcuQuote enables a sophisticated request for quote (RFQ) process that delivers quotes with unrivaled speed and precision.

CalcuQuote wanted to meet the compliance requirements of customers and partners in their highly regulated industry.

*"With securityprogram.io, I know we're on the right track to meet client and industry security requirements."*

*- Chintan Sutaria, President*

**CalcuQuote**

Moving EMS forward.

Electronics Manufacturing  
Services (EMS)

11-50 employees

*"Securityprogram.io makes it easy to track security policies, protocols, and employee security training all in one place." - Kaitlyn Dotson, Vice President*

## Solution

Being a startup team and wearing a lot of different hats they wanted a solution that enabled them to stay on top of security related tasks and track compliance all in one place.

CalcuQuote enrolled in securityprogram.io at the Complete tier to begin building a robust security program that meets the security requirements needed to do business with larger organizations.

## About securityprogram.io

Securityprogram.io is a SaaS cybersecurity tool that partners with startups to medium sized businesses in planning, executing, and measuring their security program at a rate affordable for their size. Anyone can run a security program in securityprogram.io without having security expertise.

At the Complete tier organizations are using the product on their own with access to us via email and in-app chat.
