GLOBAL

HACK

We at START Global have the mission to connect technology and entrepreneurship, thus fostering collaboration across Europe's top talents. In this context, one of our main events is our annual Hackathon - "START Hack". A Hackathon is a coding competition, where vivid community of highly-skilled coders comes together in order to tackle the challenges presented by corporate partners such as Microsoft, Accenture, Bosch & Co. For us, this is the ideal way of bringing the two worlds - technology and business - closer together.

In regards to success of past Hacks, the Hack Team decided to use the ongoing pandemic as an opportunity to fully re-imagine this year's START Hack experience - but we need your help for that! Next to St.Gallen as the Hackathons original hub with around 300 coders, our Hack will take place simultaneously in several tech hubs in Europe - thus creating one of the first fully decentralized hackathons ever.

By joining our Hack Team, you will get the opportunity to be part of a dynamic and challenging environment and build up the foundation for START's future success all over the world. To make such a decentralized event work, it is imperative for us to work closely together with several different departments of START Global. As a member of our flatley-organized team you will, therefore, get to know the entire working of our organization as well as work together with our chapters.

Potential Tasks

- Raising awareness of the START Hack and generating +1000 applications for the Hackathon
- Informing and communicating with Universities and Tech-Students Worldwide
- Supporting the execution of our partner events in other parts of Europe
- Pitching the Hackathon to Corporate Partners and acquiring funding

Your Skills

- You do not need coding experience (we let our participants do the coding)
- You have a strong interest in technology
- You are proficient in english, written and spoken

Your Benefits

- Get in touch with students from all over the world
- Gain knowledge in all things technology
- Great amount of ownership on your projects
- Be embedded in the closely-knit START network of successful entrepreneurs, investors and potential co-founders
- Improve your English and German skills

If any questions regarding the position or hackathons in general may arise, feel free to reach out to me at any time:
