ESI Communications Servers™
A powerful solution to scale with your business

ESI Communications Servers™ are sophisticated, yet simple solutions that hold the flexibility to provide both digital and IP-to-desktop functionality, and all of the vital communications features are built-in, not added-on. Available in several models varying primarily in capacity, there is sure to be one that meets your organization's needs in an on-premises solution. ESI solutions make business communications simple with intuitive solutions designed to scale as your business grows.

ESI Desktop Business Phones
For over thirty years, ESI has striven to perfect the desktop phone as the hub of business communications. ESI phones are loaded with advanced capabilities that put critical features that users rely on right at their fingertips. ESI designs the phones to work seamlessly with ESI's solutions, delivering unmatched integration and the best user experience available. To see a list of our current phones, visit www.esi-estech.com.

Save More with ESI SIP Trunks
Your company can now experience the benefits of SIP on ESI Communications Servers™ platforms. With ESI SIP Trunking, businesses can combine their voice and data networks, eliminating the need for costly analog lines and reducing monthly communications expenses by as much as half! Additional benefits of SIP Trunking include: unlimited local and long distance calling plans, on-demand audio conferencing, increasing flexibility and scalability, and reliable disaster recovery options.

Solution Highlights include:

- Supports digital and IP-based communications
- Easily scalable for growing businesses
- Unique call handling with **Quick Groups™**
- Extensive voice mail features
- Customizable auto attendant (6 levels, 100 branches)
