

NETSTOCK

Reduce excess inventory
Release working capital
Minimise stock-outs

NETSTOCK is an affordable cloud App that helps companies reduce excess inventory and free up working capital while minimising stock-outs and increasing revenue.

It is designed to integrate with ERP systems to provide visibility of inventory levels and investment, produce quality forecasts and optimal replenishment recommendations.

Visual dashboards display overall inventory performance and provide early warning of items needing attention.

NETSTOCK is easy to use, quick to adopt and can be accessed anytime, anywhere via web browser or mobile device.

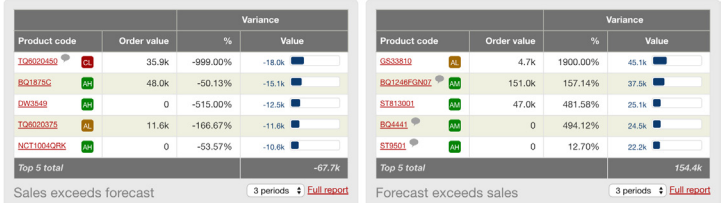

Benefits

- Reduce inventory by 10%-25%, reduce working capital and improve cash flow.
- Improve fill rates by 2%-10%, minimise stock-outs and increase sales.
- Significantly reduce the time spent on planning, forecasting and ordering.
- Better inventory visibility, including early warning of items needing attention.
- The right inventory in the right place at the right time, helping you to grow your business.

Track performance and identify problem items through interactive dashboards with drill down features

Utilises the latest forecast technology to generate item forecasts while facilitating manual overrides

> "In the first six months, we saw a 14% increase in inventory availability combined with a 38% increase in sales. NETSTOCK is a highly valued solution that gives our business a competitive edge."

Steven Cumper, Director and Co-Founder – Medshop Australia (Medical Supplies)

Fast to Implement and Cost Effective

A cloud application, NETSTOCK can be implemented in days and is accessible anytime, anywhere.

- No local server installation, providing worry-free updates and maintenance.
- No additional hardware or software to purchase.
- Delivers rapid deployment and scalability.
- No licence fees, no yearly maintenance fees and no cost to upgrade.
- A once-off cost to implement and a monthly subscription fee with no minimum term.
- Allows for easy adoption with minimal risk.

Features

Dashboards provide visibility

NETSTOCK delivers an up-to-date view of your inventory, so you know what's going on – and what's going wrong.

Dashboards track KPIs, giving you an unprecedented visibility into the health of your inventory and the purity of your data.

Classification provides focus

NETSTOCK gives you the tools to focus your energy where it will have the most impact, so you can continue growing your business.

Classify your stocked items by both value and velocity to learn new insights about your inventory with the app's Classification Matrix.

Identify your fast moving high value items, your slow moving expensive items, or your fast moving inexpensive items.

Save time creating and reviewing forecasts

NETSTOCK generates accurate, data-based forecasts that save you the time, hassle, and errors of manual forecasting.

Best-fit forecasting creates high quality forecasts for the bulk of your items, while the dashboard highlights the small percentage of items that need manual intervention.

NETSTOCK gives you the tools to create the best possible forecast, resulting in optimal purchasing and planning – helping you to grow your business.

Create orders at the click of a button

NETSTOCK automatically collects, collates, and processes your inventory data, presenting you with ideal order recommendations with one click.

Easily resolve how to fill containers by volume or weight, or to meet supplier imposed minimum unit quantities or order values.

Order ahead when buyers are due to go on leave or to cater for supplier shutdowns such as Chinese New Year.

Review, download, and import orders, saving you time and improving your ordering process.

Easy-to-use graphical user interface

The easy-to-use interface for desktops, tablets, and mobile devices has been designed to be as intuitive as possible.

Standard web behaviour enables intuitive navigation and improved ease-of-use.

Built-in support tips provide more detailed explanations.

Rich, dynamic graphics enhance understanding.

Filter listings and download them to a CSV file, or drill through to individual item details.
