

ORTHODONTICS®

Quality Manufacturing. Exceptional Service.

OUR MISSION:

To provide our customers a great experience achieved through **quality manufacturing** and **exceptional service**.

VALUES

integrity
respect
courage
commitment
accountability
teamwork

quality manufacturing

Orthodontists have one of the most important jobs—bringing renewed self-confidence and pride to every patient through improved smiles. At G&H Orthodontics, we keep patient satisfaction in mind with each bracket, wire, elastomeric and every other product we manufacture and sell.

Orthodontists worldwide have trusted G&H quality and performance for more than four decades. Our innovation and attention to detail bring the most up-to-date clinical solutions so orthodontists are best able to achieve a successful treatment plan.

THE FULL LINE OF QUALITY ORTHODONTIC PRODUCTS

G&H Orthodontics manufactures brackets, bands, tubes, archwires, springs and elastomers. In fact, because we manufacture what we sell, you benefit in all aspects of the supply chain: Quality, Value, and Delivery.

In addition, we carry the rest of the high-quality products an orthodontic practice needs. Since our founding—when G&H designed a machine to form stainless steel arches—we have grown to be known worldwide for delivering quality products backed by exceptional service.

exceptional service

CUSTOMER SERVICE IS KEY

We are committed to creating an exceptional customer experience. Here are a few examples of what you can expect as a valued customer:

- Quick and easy online ordering and reordering
- Next-day shipping on some of the most popular products
- Hassle-free returns and replacement guarantee
- Straightforward pricing for better planning
- Personal phone support when you need assistance
- Risk-free trials for new patient starts

BRACKETS, BANDS AND TUBES

DIFFERENT STYLES OF METAL BRACKETS TO MATCH YOUR PRACTICE

The G&H brackets are precisely engineered and manufactured with the focus on performance and patient comfort. The high-quality, competitively priced metal and ceramic brackets are available in a variety of popular systems and styles including miniPrevail—our state-of-the-art mini twin, and self-ligating bracket and our Agility family of products..

PRECISION-SHAPED BANDS WITH A SECURE FIT

G&H offers a complete line of contoured molar and bicuspid bands. Finished to a brilliant mirror luster, our molar bands are precision-shaped for an anatomically secure fit with excellent retention and micro-etched interiors for ensured retention.

TUBES METICULOUSLY ENGINEERED FOR GREAT RESULTS

Because buccal tubes are such a critical element in treatment mechanics, G&H has meticulously engineered a full complement of weldable and bondable convertible and nonconvertible tubes. Orthodontists recognize the clinical advantages of our Viper™ tube. As with all the appliances we manufacture, G&H applies internationally recognized quality standards in the production of our tubes to help ensure that we consistently deliver world-class quality to our customers.

ARCHWIRES WITH PROVEN PERFORMANCE

Our scientific approach to manufacturing has resulted in proven clinical performance for our archwires for over four decades. Selecting wire products with documented force values gives you the ability to apply consistent forces for improved treatment results. As a wire manufacturer, G&H maintains total control of all material specifications and production processes. By applying developed manufacturing techniques and high standards in our production processes, we can consistently deliver world-class product to our customers. We offer a complete line of archforms and alloys.

WIRES AND SPRINGS

Quality Manufacturing. Exceptional Service.

SPRINGS STAYING ACTIVE UNTIL THEIR JOB IS DONE

G&H offers both stainless steel and G4™ Nickel Titanium springs, available in closed and open coil designs. Proprietary manufacturing techniques and meticulous testing provide springs with proven, consistent force values.

ELASTOMERICS

**WE UNDERSTAND
THE IMPORTANCE
OF CONSISTENCY.
IN FACT, WE INSIST ON IT.**

Our manufacturing processes include in-process testing and recalibration to ensure the elastics we supply meet the stringent force value tolerances you require. All elastomeric polymers from G&H are medical grade. G&H manufacturing processes are specifically developed to minimize hydrophilic uptake and to create consistent forces.

AESTHETIC LINE

POWERFUL, YET NEARLY INVISIBLE

For your patients who prefer a more natural look, G&H offers a full line of aesthetic products. The powerful combination of clinical performance and aesthetic appeal has resulted in unprecedented demand for our line. The G&H cosmetic system includes our tooth-colored epoxy-coated archwires, Agility® ceramic brackets, and elastomeric ligature ties and chains.

Desired by patients and admired by doctors, G&H's line of ceramic bracket systems gives your patients the look they desire, while providing you with a quality and affordable alternative to traditional metal brackets. Our Agility® ceramic bracket system is manufactured with Ceramic Injection Molding (CIM) technology. Rounded contours and increased strength are only the beginning of Agility's clinically significant features. Your patients will love the way they look during and after treatment.

CLINICAL, OFFICE & PATIENT SUPPLIES

THE CONVENIENCE OF **ONE-STOP SHOPPING**

As your supplier of the full line of orthodontic products, we are pleased to also offer the clinical, disposable and consumable supplies needed for a successful practice. We carry the top brands and also offer personalization on some patient supplies to help you promote your practice. You'll find hundreds of products in our catalog and on our website at GHOrthodontics.com.
