

miniPrevail[®] SL

INTERACTIVE SELF-LIGATING BRACKET SYSTEM

The answer to achieve excellent, predictable treatment results in less time.

An **INTERACTIVE** self ligating bracket which uses a NiTi spring clip that is strong enough to deliver continuous and consistent forces while assuring tooth movement control. When using round archwires (up to .020") allows **PASSIVE** engagement during initial leveling and alignment to reduce friction and improve sliding mechanics. When using rectangular archwires (from .016"x.022"), becomes **ACTIVE** to provide effective torque and rotation control toward the end of treatment.

Intelligent Design	Patient Comfort
<p>COLOR ENHANCED I.D. for easy bracket selection</p> <p>ASSEMBLED USING LASER TECHNOLOGY</p> <p>17-4 SURGICAL-GRADE STAINLESS STEEL for greater strength</p> <p>METAL INJECTION MOLDED (MIM) Constructed of a specialized micro-grain stainless steel MIM powder, ideal for creating small, robust appliances that are inherently stronger and more dimensionally accurate than other similar brackets. Ensures exact tolerances and strength of design</p> <p>COMPOUND CONTOUR BASE for increased bond strength and precise bracket placement</p> <p>MICRO-ETCHED 80 GAUGE MESH ANATOMICAL BONDING BASE matches the anatomical curvature of the tooth for maximum contact and a strong, consistent bond</p>	<p>LOW PROFILE</p> <ul style="list-style-type: none">• reduces occlusal interference• enhances comfort <p>AMPLE TIE WING for elastomeric chain and ties</p> <p>FULL SLOT AREA COVERAGE for total tooth movement control</p> <p>Optional hook on cuspids and bicuspids</p> <p>NITI SPRING CLIP for maximum resistance to permanent deformation, durability, and stable performance - prevents unwanted opening, yet opens easily with an explorer, closes with gentle finger pressure</p>
