### **Survey**

Would you support or oppose allowing students who could be at a risk of contracting the Coronavirus — for example, students with immune disorders — to take these standardized tests online instead of in-person, as long as the students taking the online tests were still supervised by teachers through a camera on the students' computers? .....	3
Say that the state of Arizona does not allow these standardized tests to be taken online by students. If this were the case, would you support or oppose removing the requirement that 95% of students in every school take these tests, so that students who could be at risk of contracting the coronavirus could be allowed to stay home? .....	4

\*Totals may not equal 100%, due to rounding

INTRO) Now, on to the topic of education. As you may be aware, all children who attend public schools in Arizona will, from time to time, have to take a standardized test. This test is used by the state of Arizona to determine if the child’s school is teaching its students effectively. Currently, the State of Arizona requires that these tests be taken by students in-person and that 95% of students in every school take these tests.

Would you support or oppose allowing students who could be at a risk of contracting the Coronavirus — for example, students with immune disorders — to take these standardized tests online instead of in-person, as long as the students taking the online tests were still supervised by teachers through a camera on the students’ computers?
