

GEARBOX_{Rx}

WE CUT THROUGH THE NOISE

We've brought the Industry's **Leading Service Center, Gearbox Manufacturer** and our **Local Experts** with extensive application knowledge together to offer you a single point of accountability.

Let's face it, finding an industrial gearbox repair shop you can trust to do the job right is difficult and you simply don't have the time to for all the complications involved with equipment removal, shipping logistics, replacement options...the list goes on. You may have an older "legacy" gearbox that the original manufacturer no longer supports. No parts, no factory repair or refurbishment, just another number in a long line at an "authorized" repair shop.

We offer a solution by simply stating: ***We'll handle everything.*** Our experience, knowledge, and partnership allows us to complete the project from start to finish.

THE TEAM

HARD CHROME SOLUTIONS

Our 160,000 square-foot facility can handle it all... emergencies included. **HCS** is a fully equipped machine shop and repair facility operating two shifts, 24-hours a day, seven days a week.

Our staff excels at the gearbox service others often shy away from: extruders, mixers, Banbury mixers, blow molding equipment, centrifuges, rolls, trunnions, cable reels, pumps and anything else that rotates.

We stock over 18,000 critical parts: bearings, seals, shaft materials, and gear blanks. Services include gear cutting, grinding, line boring and honing, CNC manufacturing, chrome and nickel plating.

All repaired and refurbished equipment includes a 36-month warranty from start-up or commissioning and undergoes rigorous testing on our purpose-built test stand before release.

ESENPRO

Our partner offering a full line of standard industrial gearboxes, custom gearboxes, and specializing in drop-in replacement gearboxes. Established in 1947, **ESENPRO** is family-owned and operated. We are ISO 9001-2015 certified. We are also CE certified for helical and helical bevel gearbox. **ESENPRO** is a proud member of AGMA since 2005.

GEARBOX GURUS

Bring your project from concept to reality with **GEARBOX GURUS**. Reverse engineering services include FARO scanning, 3D modeling and 2D line drawings to ensure complete accuracy with retro-fitting and drop-in replacement gearbox projects. We can also custom-engineer complete drive packages and geared drive solutions for the steel, rubber, plastics, cement, mining, material handling, and oil and gas industries.

ADDITIONAL SERVICES

- Start-up & Commissioning
- Preventative & Predictive Maintenance
 - Baseline Measurement Collection
 - Laser Alignment • Vibration Analysis
 - Noise Analysis
 - Data Analysis • Oil Sampling
 - Installation

A PARTNERSHIP THAT PROVIDES:

- Industrial Equipment Repair
- Gearbox Overhaul & Repair
- Refurbishment
- Reverse Engineering
- Drop-in Replacement
- New Product Development
- 3D Scanning & Modeling Services
- Design & Engineering Consulting
