# UniFlour 35501 Pea

## Extruded yellow pea flour for piglet milk replacers

Innovation with pulses!

clean  
label

To reduce the cost of milk replacers without having any negative impact on animal performance, plant-based ingredients like cereals or pulses have been used for many years

In pulses, pea protein contains similar proportions of lysine as soybean meal

This makes pea a good addition to cereals: cereal proteins are rich in sulphur amino acids and pea contains more lysine. Their amino acid profiles can be considered complementary

### Discover the benefits of our specific extruded pea flour

- High functionalities: emulsification, dispersibility, water solubility, easy to use
- High nutrition: rich in protein (22%), rich in natural minerals (phosphorus, potassium, magnesium)
- Reduced antinutritional factors
- Controlled microbiology
- Sustainable & GMO-free
