

Our mission

We are committed to making a positive difference in the lives of dental practitioners and patients worldwide by bringing products to the market that make dentistry easier and safer.

We strive to provide products that enable dentists to fulfill a social responsibility to provide better, healthier patient care.

We seek to provide a greater sense of satisfaction to each of our global customers by offering truly innovative, effective and high-value products and solutions supported by excellent quality and customer service.

NEOBURR®

The greatest invention since sliced bread

More blade contact with the tooth means fantastic cutting ability without clogging up the blades.

We don't have a breaking point

Blended Neck® technology on most NeoBurr carbides provide superior strength and durability. Being constructed with a single piece of material eliminates the weld that is often the point which other burs separate. No breaking point here.

Testing, testing 1-2-3

We tested it but others did too. In 3rd party testing our 557² carbide was shown to be up to 70% stronger than the competition.

Nobody likes a chatter box.

With its unique construction NeoBurr provides a fast, smooth, chatter-free experience. This is good for you and your hand-piece.

"Love your product. Price and packaging, quality of cut, all exceeds my expectations."

E. Rothfield DDS,
Hollywood, FL

Individually wrapped and highly visible through a poly packet, each carbide is identified by bur number and shape description.

Single use
