

Portable Quad Frame Fall Protection Systems

The Tuff Built by Diversified Mobile Quad Frame Fall Protection System provides a convenient, portable means of securing an OSHA compliant fall arrest rigid rail in areas with limited space or outdoor areas lacking overhead anchor points for tie-off.

Tuff Built Product's mobile Quad-Frame allows you to place overhead anchor points where you need them in your work place. Quad or Box Frame Fall Arrest Systems are rigid rail systems built to accommodate a specific area or piece of equipment and can be designed as permanent or portable frames, for ease of relocation.

| Part # | Model | W | H | OH | L | OW | Wheels | Price |
|--------|------------------------------|------|------|------|------|------|---------------|-------|
| 70631 | Quad-Frame, 11W-13H-2R-2A-RM | 134" | 158" | 168" | 238" | 229" | Rubber Molden | |
| 70763 | Quad-Frame, 11W-13H-2R-2A-RM | 134" | 158" | 168" | 478" | 158" | Rubber Molden | |
| 70779 | Quad-Frame, 17W-27H-2R-2A-RM | 207" | 312" | 322" | 342" | 230" | Rubber Molden | |
