

Preventive Maintenance ML™

Reduce downtime and maintenance costs while improving quality

With Pluto7 comes truly **unique** capabilities for helping businesses leverage machine learning, artificial intelligence, and analytics on Google Cloud. **Preventive Maintenance ML™** provides predictive capability to forecast failure and determine remaining useful life. Maximize your equipment capacity with AI to improve productivity and revenue.

Why Pluto7?

ML Use Cases

- Reduce Downtime
- Reduce Maintenance Costs
- Improve Operation Efficiency
- Improve Quality
- Shorter downtimes

Pluto7 Services

1. Innovation Workshop

Identify Use Cases

Define your AI and ML strategy on GCP

2. POC

ML Solution Prototyping

Centralize data and test

3. Solution Deployment

Migration and ML solution activation

Execute and empower business transformation

Preventive Maintenance ML™ focuses on identifying patterns in both sensor and yield data that indicate changes in equipment condition. It leverages **machine learning** and **predictive analytics** to determine the remaining value of assets and accurately determine when a manufacturing plant, machine, component or part is likely to fail, and thus needs to be replaced.
