## GLOSSARY

**Artificial Intelligence Market Projections** <sup>(1)</sup> Sources: Grand View Research, AI Market Research, December 2019; McKinsey & Company, "Artificial Intelligence: Implications for China," April 2017

**Industry Experts** <sup>(2)</sup> Through the expertise of its leadership team and strategic advisors, including 7 PhDs in the fields of engineering and robotics, ROBO Global® searches worldwide to find cutting-edge companies deploying robotic, automation, artificial intelligence, and healthcare technology solutions to industries and people. By defining the ecosystem, they are able to track the global growth of the industry.

**S&P 500** is an equities index generally considered to be a benchmark for the US equities market. It is comprised of the 500 largest companies having common stock listed on the NYSE or NASDAQ.

**ACWI** The MSCI All Country World Index is a global index generally considered to be a broad measure of equity-market performance throughout the world.

**Beta** is a measure of the volatility of a portfolio in comparison to the market as a whole.

**Standard Deviation** is a measure used to quantify the amount of variation in a set of data values.

**Sharpe Ratio** is a risk-adjusted measure that calculates excess performance with respect to the risk free rate, per unit of volatility over time.

Beta, Standard Deviation and Sharpe ratio are calculated on the last 36 months.

## RISK DISCLOSURE AND IMPORTANT INFORMATION

**Carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. This and additional information can be found on the Fund's full or summary prospectus, which may be obtained at [www.roboglobalaetfs.com](http://www.roboglobalaetfs.com). Read the prospectus carefully before investing.**

Exchange Traded Concepts, LLC serves as the investment advisor to the Fund. The Funds are distributed by SEI Investments Distribution Co. (SIDCO), which is not affiliated with Exchange Traded Concepts, LLC or any of its affiliates.

Investing involves risk, including the possible loss of principal. Narrowly focused investments and investments in smaller companies typically exhibit higher volatility. International investments may also involve risk from unfavorable fluctuations in currency values, differences in generally accepted accounting principles, and from economic or political instability. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Diversification may not protect against market risk. Indices are unmanaged. One cannot invest directly in an index. There is no guarantee the fund will achieve its stated objective. THNQ is non-diversified.

The Fund invests primarily in the equity securities of Artificial Intelligence Companies and, as such, is particularly sensitive to risks to those types of companies. These risks include, but are not limited to, small or limited markets for such securities, changes in business cycles, world economic growth, technological progress, rapid obsolescence, and government regulation.
