

Open-space paint spraying system with telescopic dryer

Industry sector:

Steel construction

Work piece:

Steel components

Year of construction:

2008

Technical data:

- Open-space paint spraying system with long-range nozzles 45 x 6 x 7 m
- Moveable telescopic drying tunnel

Special features:

- Open-space paint spraying system with heat recovery system by plate heat exchanger, automatic switching of segments via person detection system, Quick Clean System
- Telescopic dryer with 3 docking stations and second parking position

Open-space paint spraying system
