YOUR MOTIVE, YOUR CHOICE 01

"Every man is a creature of the age in which he lives; very few are able to raise themselves above the ideas of the time."

VOLTAIRE

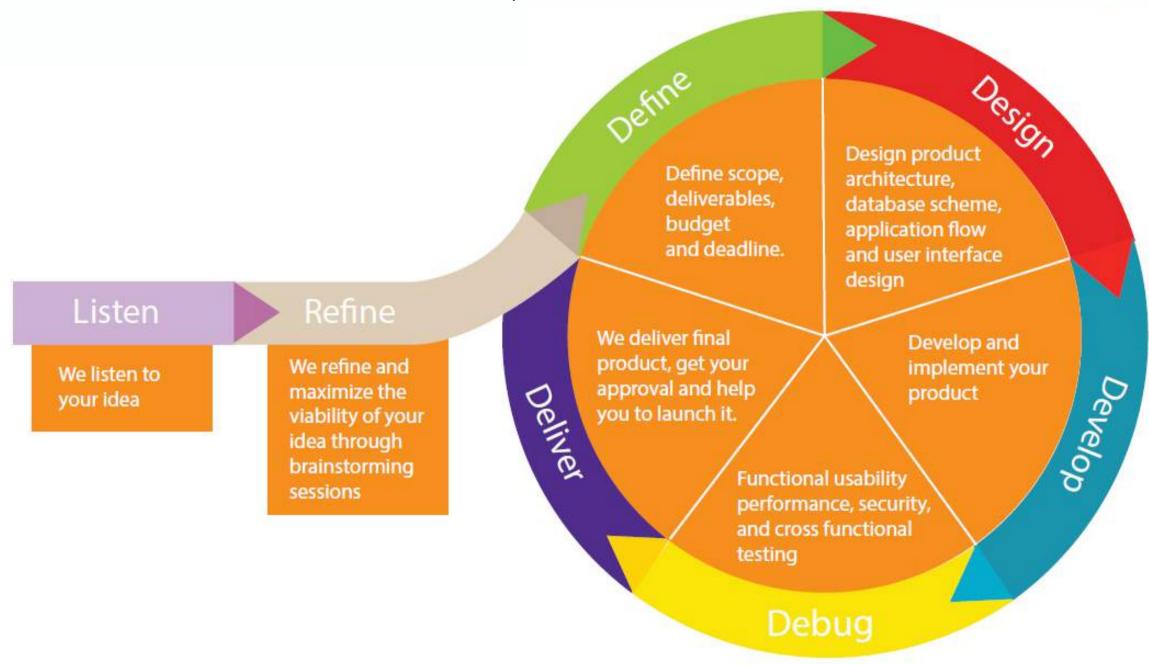

Why change is not only necessary, it is an every day occurrence to ensure business continuity, growth and competitiveness.

Plan for continued growth, build the team to succeed.

02

Understanding and qualifying the stages of capital equipment acquisition create understanding and confidence in the choice made and the future impact on business activities.

Create the necessary understanding to achieve progress.

MEASURE AND VERIFY THE STEPS TOWARDS IMPROVEMENT O3

- Applying metrics to test assertions that will have a significant contribution to productivity is essential.
- Ensuring that these metrics have been scrutinised and accepted prior to each stage of selection is also crucial to support a validated selection process.
- Make the detail count, be thoroughly informed.

Project Management & Control

Planning, Scheduling, Scope / Time / Cost Management, Project Tracking, Project Status Reporting

Requirements

Design

Construct

Test

Implement, Maintain & Support

- Performance outcomes
 Functionality and
- 2. Functionality and rationale
- 3. Client Requirements
- 4. Automation and labour interfacing
- 5. Utlisation
- 6. Capacity
- 7. Availability
- 8. Flexibility

- Concept development and design
- 10. Concept review
- 11. Concept confirmation
- 12. Design criteria
- 13. Functional configuration
- 14. Implementation design
- 15. Design review

- 16. Business standards and process acceptance
- 17. Automation utilisation and scope verification
- 18. In principle design and configuration acceptance
- 19. FAT metrics plotted
- 20. DLP (Defects Liability Period) performance metrics mapped
- 21. QA/QC
- 22. Efficiency definition
- 23. Flexibility capability and relevance
- 24. FAT results comparison

- 25. FAT and DLP establish performance metrics
- 26. Implementation
- 27. Construction and delivery schedule verified
- 28. Impact of change plan designed
- 29. Support structure mapped and verified
