

A holistic solution to Cyber Safety and Cyber Security

Linewize and Check Point, the all-in-one solution.

The Internet in schools is ubiquitous - evolving pedagogies demand fast, safe and secure Internet connections that empower staff to teach, whilst improving learning outcomes for students who, increasingly, live their school lives online.

However, the same technology is also opening the doors to cyberattacks directed at schools, whose networks amass large amounts of personal data that needs to be protected.

To achieve these outcomes, schools traditionally employ several third-party vendors that often lead to conflicts and work for an already stretched school IT team.

Linewize understands this challenge and delivers an **all-in-one cyber security and cyber safety solution** for schools, supported by an **Australian based support team**.

Cyber Security

With network security, data integrity and user privacy so important in today's digital age, keeping the school's network secure is the most important of many daily tasks undertaken by school IT teams.

Linewize has partnered with internationally-renowned cyber security vendor Check Point, giving your schools the ability to leverage the expertise of Linewize and the uncompromising performance of Check Point in a fully

managed cyber solution, reducing the burden on school IT teams.

Linewize's Managed Firewall is:

-  Secure
-  Powerful
-  Simple
-  Managed

Cyber Safety

Linewize provides schools with a suite of educationally-focussed cyber safety tools to help schools create cyber-safe communities where students thrive, by:

-  Supporting student well-being
-  Delivering powerful insights and analytics
-  Engaging your school community

These tools help solve the real-world challenges of today's schools, including:

-  Controlling 100% of student hotspotting
-  Detect and stop student VPN use
-  Ensure duty of care on personal mobile devices
-  Empowering teachers in the classroom

Best in class support

Linewize's expert team of Australian-based engineers will manage your school's cyber security and cyber safety needs, providing a one-stop shop for your IT team.

About Linewize

Linewize is a global company committed to creating online school environments where students, schools and communities thrive. Driven by a philosophy of education, empowerment and engagement, we provide schools and their communities with the tools, education and support needed to ensure students leave school as responsible digital citizens.

Create cyber-safe communities where students thrive
