

## RAM TRUCK

### *Safety, ergonomics, and productivity*

Upgrade your fleet vehicle's ladder storage solution with Prime Design's DeployPro™ system – the industry's only ergonomic, rear deploying solution for safe and productive fleet vehicles.

The DeployPro™ design philosophy started with the worker – how can we make the job safer, easier and more comfortable for the human body? The rear deploying design allows the user to safely stow and deploy ladders from behind the vehicle, shielded from potential road hazards or traffic.

The system's deploying and stowing features are ergonomic and help to protect operators from muscle stress, strain and fatigue. Get your fleet or business started today on the road to safety and productivity.

DPS-8000 + PBB-0021

### *Install on any RAM Truck Pickup*

Stow and deploy ladders from the rear of the vehicle, safely away from potential road hazards

Adjustable, removable handle for user defined positioning and secure ladder deployment

Integrated hydraulic cylinder for controlled ladder deployment and gas assisted lift for easy stowing

Stow and deploy ladders in less than twenty seconds

Users feet stay safely on the ground, eliminates the need to climb on bumper or tire

Lightweight aluminum construction with stainless steel fasteners for durability and longevity

Factory assembled for a quick upfit with adjustable ladder support bars to fit your fleet vehicle and ladders

*Patent Pending*
