

1 Minute Paper (5 minutes)

- At the end of a class session, set a 1 minute timer and invite your learners to generate the most significant thing they learned from the session, or one open question they still have.
- Post a question in the Q&A with the date of the class session and ask your learners to post their reflections (anonymously if they wish), which you can download
- You can also ask them to type it in the Chat (privately to you if they wish), which you can download
- Or, as a group activity, ask them to contribute their reflections on a Google doc using Distribute Docs.
