POS Asset Protection Suite

eConnect™

Asset misappropriation
accounts for a whopping 86% of fraud cases

41% of fraud
is carried out by employees

Protecting the POS to Maintain Profitability

Each year, hospitality resorts and casinos lose 5 percent of their revenue, adding up to $4.5 trillion globally per year. Asset misappropriation accounts for a whopping 86 percent of fraud cases. This theft can range from cash larceny to payment tampering, skimming, ransomware, and more.

Fraud comes in many forms, and your customers can even be to blame. In fact, 41 percent of fraud is carried out by employees! POS surveillance can help identify threats or ongoing fraudulent activities.

The POS Asset Protection Suite by eConnect is an advanced loss prevention and exception-based reporting system designed to protect against internal theft by cashiers, bartenders, and managers. Protect your assets, save money, and improve revenue with the POS Asset Protection Suite.

Real-Time Intelligent Dashboards

Quickly Detect Theft

Proven ROI in 6 Months or Less

This suite has been ranked **No. 1 in the gaming industry** for over a decade!

POS Challenges

With such a large volume of daily transactions, restaurants and bars have a substantial risk of employee theft, which could go unnoticed for years. A comprehensive surveillance system tied into the POS can help with:

Identifying Behavioral Analytics

Over the last 13 years eConnect has deployed POS Connect in the top gaming and hospitality venues across the globe. Surveillance teams rely on POS Connect to automatically alert them of situations where theft is likely occurring. This is accomplished through a mix of behavioral analytics, real-time dashboards and automated alerts.

Validating High-Value Transactions

Purchases across the globe are increasingly becoming cashless, and credit card charges are the norm. Don't wait weeks to discover that customers are attempting to charge back. With a video record, it's easier to identify who paid with fraudulent credit cards. POS analytics combined with video protection can validate transactions to ensure you're not being taken advantage of.

Preventing Scams

New scams appear every day. Team members game the system and skim up to 15 percent of revenue from the top to increase their tips and give their friends and families things for free.

The POS Asset Protection Suite provides key insights into specific transactions by loading the video at that particular moment in time. The powerful and seamless integration between data and video automates event reviews, eliminating the tedious job of digging for details. Quickly find what you need with dashboards and video. With this extra set of "eyes," your team members will easily spot employee theft and cut revenue losses in half.

Avoiding Creeping Liberties

When one person gets away with stealing, it can have a domino effect because employees who steal also train colleagues. Thieves often deflect blame to those who have trained or managed them, claiming to have been taught that the fraudulent behavior was part of the tip-sharing process or similar. As a result, theft increases over time. Use POS protection to identify the first bad apple before the rest of the tree is affected.

POS Asset Protection Suite Products

Get the protection you need by connecting your existing POS and video system with our powerful POS Asset Protection Suite. The POS Asset Protection Suite can quickly detect employee theft with a state-of-the-art behavioral intelligence engine to help you determine which employees are operating outside the norm.

The POS Asset Protection Suite can quickly detect employee theft.

POS Connect

A solution that can be premise-or cloud-based depending on customer needs, POS Connect provides interconnectivity with major POS systems while securing data and video in regulated surveillance networks.

Live Analyst Capabilities (Add-On)*

With the optional Live Analyst feature, get access to POS expertise to reveal in-depth insights in real time. Trust an eConnect expert or do it yourself depending on your needs, know-how, and resources.

*Additional fee applies

Differentiating Features

A few core features make the POS Asset Protection Suite stand apart from other similar solutions. More information from the eConnect system will help you make the best decisions.

✅ **Mobile Alerting System**

Any workstation connected to eConnect's products is capable of receiving real-time push notifications, alerting your entire team to vital issues whether they're on-site or on-the-go. Mobile alerts integrate with your existing tracking systems, making them equally effective for issues ranging from preserving self-exclusion to flagging large purchases.
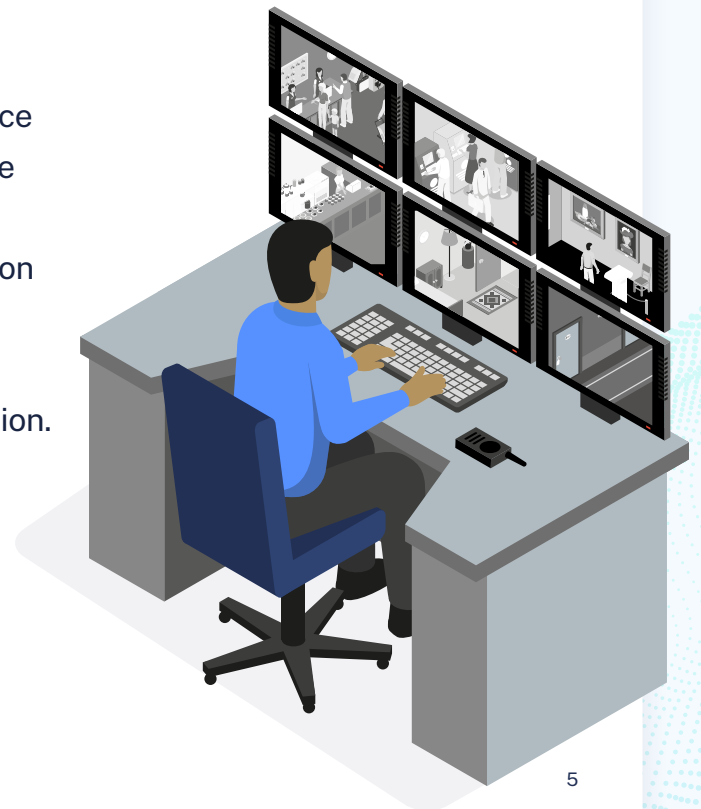

✅ **Dynamic Dashboards**

Get access to a dynamic dashboard that refreshes itself automatically giving you up to date information on potential theft and other anomalies that can cause financial loss for your business.

✅ **Behavioral Analytics**

Measure team members' performance against one another to determine the outliers who are likely skimming for profits. See a side-by-side comparison of each team member to easily understand and know what areas of your business to take immediate action.
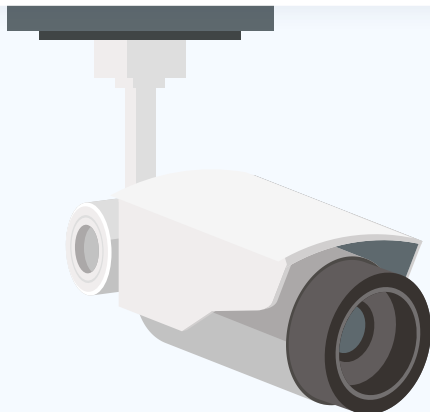

✅ Desktop POS Application

Focus on the information you need when you need it. Create custom, flexible dashboards within the POS application to meet your operational needs.

✅ eConnect University (ECU)

Enhance your team members' career path by providing access to our customer-exclusive knowledge base. Learn about the latest security risks and mitigation strategies on demand from eConnect pros. Unlimited employees can achieve a lifetime certification and join 2,500 other eConnect certified professionals across the globe.

Get access to a smart platform to closely monitor what's going on at or near the register.

Supported Integrations

All major POS systems (e.g., Oracle, Micros, Agilysys, Aloha)

All major surveillance systems (e.g., Bosch, Pelco, Synectics, IndigoVision)

All major IP or network surveillance cameras (eg. AXIS, WiseNet, Avigilon, Pelco)

Turn on integrations right away thanks to plug-and-play features. Our POS Asset Protection Suite is designed to be easy to use for users of all technical skill levels.

Customers generally see **ROI within six months**.
