eClear® Rapid Access Control Suite

ID Scanning and Fast Access to Your Casino

Your casino is a revolving door, between patrons, employees, and other traffic. Get the control and knowledge you need to manage high-volume traffic with eConnect's eClear® Rapid Access Control Suite.

eClear® incorporates facial recognition technology (plus optional health-screening capabilities) to improve labor efficiency and improve labor efficiency and provide better service.

eClear® is highly accurate and uses a top-five algorithm rated by the National Institute of Standards and Technology (NIST).

AI and face-matching technology are more reliable and affordable than security guards.

eClear® clocks employees in and out up to eight times faster than hand scanners and fingerprint readers.

Deploy the **eClear® Rapid Access Control Suite** to take control of the flurry of activity your venue sees each and every day.

Access Control Challenges

Access control is essential to your casino's operation. The eClear® Rapid Access Control Suite solves various challenges related to identity management and employee tracking.

Outdated Employee Tracking and Patron Monitoring

Is your casino still using card-based employee time tracking? Manual clock-ins make it easy for colleagues to engage in buddy-punching—fraudulently clocking in and out for one another. The eClear® Rapid Access Control Suite solves this problem with an ID-driven alternative, improving back-of-house monitoring with employee time punch automation and visitor/vendor tracking so you know how and where individuals are moving through the property.

Mitigating Human Error and Turnover

From crowded parking lots to seemingly limitless traffic coming through your venue's doors, there's so much to track, and persons of interest can slip through the cracks. eConnect's eClear® Rapid Access Control Suite automates facial recognition and identification in real time, screening the traffic coming through your doors and alerting your team to issues before they become catastrophes. Differentiate between employees, VIPs, and undesirables in seconds. Plus, you can spot vendors early to prevent fraud and get a heads-up about surprise inspections.

Syncing Data Across the Entire Enterprise

Casinos operating across multiple locations have much more to keep track of at all times, and each location is unique. The eClear® Rapid Access Control Suite automates and shares vital details across multiple properties to provide an easily accessible data bank. Sync everything from self-exclusion onboarding and data validation to employee IDs and vaccination statuses under one roof.

eClear® Rapid Access Control Suite Products

The eConnect eClear® Rapid Access Control Suite offers modern solutions to the problems of yesterday and today. Control employee attendance in a new way and monitor your traffic flow with technologically advanced products.

> **When anyone walks through your venue's doors, the eClear® ID Scan provides identity verifications and ensure that undesirable guests don't get in.**

eClear® Contactless Time Punch and Temperature Check

eClear® enhances patron and employee safety at the door. Its integrated face matching capabilities ensure rapid access control, keeping folks moving where they want and need to go in your venue. Easily check in vendors, visitors, and employees safely and securely. Plus, speed things up by using it as a contactless time punch for employees.

eClear® ID Scan

When anyone walks through your venue's doors, the eClear® ID Scan taps into its integrated camera—available with or without a screen—to provide identity verification and ensure that undesirable guests don't get in. And if capacity is a challenge for you, take advantage of the embedded guest-counting feature to manage your traffic flow.

Differentiating Features

A few core features make the eClear® Rapid Access Control Suite stand apart from other solutions. More information from the eConnect system will help you make the best decisions.

Mobile Alerting System

Any workstation connected to eConnect's products is capable of receiving real-time push notifications, alerting your entire team to vital issues whether they're on-site or on the go. Mobile alerts integrate with your existing tracking systems, making them equally effective for issues ranging from preserving self-exclusion to flagging large purchases.

ID Scanning Device

The physical eClear® ID scanning device simplifies ID verification with advanced features. The device checks for 50 points of fraud in seconds. *Plus*, it uses face matching to compare 70 nodal points to ID enrollment photos. In addition to enrolling VIPs into your casino management system, the scanner successfully flags known scammers so you can show them the door. For an additional fee, enable a passport scanning module.

Key Casino Integrations (Optional Add-On)

eClear® pulls information from your player tracking system to reference patron identities, giving you the ability to keep excluded patrons out and offer VIPs special access to your venue. Additionally, ticket-in, ticket-out (TITO) system integrations alert your compliance team when a patron exceeds AML thresholds.

eConnect University (ECU)

Enhance your team members' career path by providing access to our customer-exclusive knowledge base. Learn about the latest security risks and mitigation strategies on demand from eConnect pros. Unlimited employees can achieve a lifetime certification and join 2,500 other eConnect certified professionals across the globe.
